love and the divine are the best meanings there can be just because love stands at the top of your feelings and you treasure the most while the divine is everything that exists you cannot find anything beyond love and the divine capable enough to set your meaning in life and in this world simply because there is nothing else beyond them however there is significantly more to learn and understand about the human meaning just because as it is presented in this world today through science literature philosophy and through the rest of ideologies it is not enough you fail to understand the human meaning and this causes you to fail your own meaning in life and in this world at least your natural meaning as you receive it from life and from the divine because the concept of meaning is presented to you empirically today you cannot understand it accurately in this manner but only through doctrine and beliefs you can never engage your reasoning in this manner in order to grasp accurately your own natural meaning your natural meaning is easily hijacked and everything is done on purpose to harm and exploit you in this manner you end up fulfilling consensually implemented meanings throughout life on behalf of the rich and the powerful of this world since they are the ones controlling ideologies and therefore consensual meanings in this world not much that you do now counts for life and for the divine despite of what ideologies tell and promise and when you look back now you may see the kind of world that you create and do not blame the rich and the powerful of this world since you are the one doing everything for them many times it is for your children that you struggle throughout life to make them happy to make them worthy and to make everything count because this is exactly your meaning in your family yet can t it be the same in your community and in society does it ever make a difference to have or not to have a specifically defined meaning in life and in this world yes it certainly makes a difference because all meanings count even the slightest ones since they are connected and it is always a matter of identifying your meanings instead of fulfilling them unknowingly otherwise you end up working your entire life in vain while through your consensually

induced meanings you end up working against the meanings of others deliberately or not living your life against your loved ones while they can certainly feel and this ruins entire relationships this is your consensual meaning in your family in society in life and in this world and so you end up living your life against yourself against your own natural meaning throughout this book we follow identify define understand and model the human meaning genuine and consensual from all perspectives and in all contexts you learn about your meaning in life in this world in society within your family and genetic line within your own cognitive system within higher worlds and within everything that exists

our water supply the air we breathe air is essential to human life yet man has shown a remarkable disrespect for air since the industrial revolution we spew pollution including carbon dioxide sulfur and other harmful chemicals into the atmosphere at startling rates it is vital to the ongoing health of mankind that we begin to show more respect for the atmosphere and what we put into it the limits of fossil fuels oil has been an abundant resource for hundreds of years but supplies are becoming scarcer indeed the scarcity of oil has led to an increase in oil prices making it important and economical for consumers to focus on efficiency of usage efficiency in the home car and in life can not only save money it can help the environment the food that nourishes many of the foods we eat on a year round basis are in fact seasonal in different areas of the world this means that to get these foods during seasons they do not grow they are shipped from elsewhere in the world while this allows us to have tomatoes in the winter it is important to note that these tomatoes are not as fresh or flavorful as those grown locally in addition the constant transport of food over vast distances contributes heavily to global pollution as the amount of energy consumed and waste created to transport fresh food is extremely large the fragile balance the earth is hospitable to mankind because of the balance maintained in the environment with our constant pollution and energy use we are threatening that balance and so harming ourselves and our future if this balance is disturbed in any major way the planet could become uninhabitable to future generations you can save the earth offers seven simple ways that you can contribute to a positive future love the earth a deeper understanding of your relationship with the earth and the joy and health it brings you is important to changing your behavior to accommodate the earth s needs make wiser choices in this day and age there are a plethora of products that offer energy saving environmentally friendly options for the home and business choose to reduce reducing energy usage and consumption are great ways to help the environment and save money embrace green technology compact fluorescent lights offer a more energy efficient alternative to incandescent lights adding insulation to your home can help you reduce your energy consumption and save you money recycle reuse and repair the rampant consumerism and short lived product life spans we see today are relatively recent developments during more challenging economic times people often made do with what they had this meant repairing
