architecture is making its presence felt in cutting edge fashion the pliable metals membrane structures lightweight glasses and plastics used in building construction are creeping onto the catwalk as they do so their impact on recent textile developments has produced fabrics that enable clothing to act as individual climate controlled environments that can exchange information with embedded sensors resulting in wearable dwellings that act as both shelter and clothing at the same time architects are borrowing the techniques of pleating stapling cutting and draping from traditional tailoring to design buildings that are flexible interactive inflatable and even portable although the relationship between architecture and fashion was recognized more than a century ago the connection between them has rarely been explored by historians designers

or practicing architects the fashion of architecture is the first attempt to investigate the contemporary relationship between architecture and fashion in considerable depth by examining the ideas imagery techniques and materials used by visionaries such as martin margiela issey miyake alexander mcqueen tadao ando and daniel libeskind as mavericks ranging from hussein chalayan and rei kawakubo to rem koolhaas and zaha hadid describe architecture s role in the formation of fashion identities new readings of both areas emerge probing and far reaching in its content the fashion of architecture is the most comprehensive study of this exciting area to date

ces dernières années les rapports entre l architecture et la mode sont devenus de plus en plus apparents ce livre largement illustré examine les nombreux principes visuels et conceptuels qui unissent mode et architecture

architecture has become a powerful tool in the fashion business perfectly poised and detailed shopping environments help to launch and build the corporate identities of the most conspicuous and prevalent fashion houses worldwide as clothes designers diversify into all sorts of product ranges from homeware to sports gear and expand in the the virtual world of e commerce the architectural image of built shops is becoming all the more apparent and all pervasive featuring interviews with high profile architects rem koolhaas jan kaplicky of future systems and david chipperfield and covering among others comme des garçons dolce gabbana issey miyake prada and yves st laurent stores this issue takes a close look at the relationship between fashion and architecture it examines issues such as what role architecture plays in the formulation of fashion houses identities whether the line between fashion and architecture has become blurred and if virtual shopping environments are intensifying the need to experience architectural space in the high street probing and far reaching in its editorial content fashion and architecture is the most comprehensive and high quality visual record of current fashion retail

the purpose of this architectural endeavor was to explore the two worlds of fashion and architecture together in one high end retail fashion house i wanted my thesis to be something that i was very passionate about i also wanted my architecture to excite me so that i could work on it for a whole year and still feel the same passion at the end as i did going into the project i decided to combine two things that i care deeply about architecture and fashion there are many famous architects that have designed high end retail but i wanted to go beyond that i wanted to design a fashion house that embodied the whole fashion experience from the first designs of the fashion designer the living quarters for the main designer to the manufacturing then to the runway and the last step to be marketed and displayed to the public in the showroom retail store the architecture focuses on the experience of the customer as they move through the building and the views that they will see and the people that will be viewing them the main focus of my building the runways engage the street and the customers in the building so everyone feels like a model and a part of the fashion world experience

an investigation of skin and a range of textural elements wishes to seek a parallel study of the body and its relationship to applying architectural clothing the practice of reinterpreting textures sounds colors smells etc invites the potential for an event of amplified stories and memories engaging the local contexts through the use of our senses establishes the core of a considered architecture the experiences of passing through space considering the whole engagement of the parallels of architecture and fashion is established through the interpretation of the specific methodological principles and strategies which then begins to initiate an invigorating side effect to our senses it is through the formation deformation and reformation of an articulate body that architecture can redefine beauty and utility through space

at a time dominated by the disappearance of future as claimed by the french anthropologist marc augé utopia and religion seem to be two different ways of giving back an inner horizon to mankind therefore this book on the one hand considers the importance of utopia as a tool and how it offers an economic and social resource to improve cities wealth future and livability on the other it explores the impact of religious and cultural ideals on cities that have recently emerged in this context based on numerous observations the book examines the intellectual legacy of utopian theory and practices across various academic disciplines it also presents discussions theories and case studies addressing a range of issues and topics related to utopia

architectural theory has illuminated the inherently connected relationship between fashion and architecture both disciplines shelter the body react to spatial volume rely on a process and take a work of creativity from its two dimensional concept into a three dimensional reality they affect and

are effected by current economies politics and cultural situations while concurrently operating outside of them at the same time through these similarities a disparity is revealed beyond a difference in scale fashion endures in an ephemeral landscape grasping for the next innovation rejecting past notions altering perspective every few months architecture produces at a slower rate establishing a permanence and solidity in volume that is free from defined intervals of creative development and exhibition it reacts to seasons defined by the climate rather than the fashionable elite designing architecture for fashion today utilizing this temporal discrepancy will reach beyond the surface correlations of the disciplines and speak to the experiential quality of a space transitioning through the transient perceptions of time architecture will become more than a space for a community to occupy but it will retain an intangible quality a mindset reflective of the organization it symbolizes to apply this methodology an algorithm and process for an architecture for fashion will be designed generating spaces for making exhibiting and archiving as a representation of fashion experiential architecture promoting perspective beyond surface similarity will establish a dynamic environment intermediating between fashion and architecture for a fashion of architecture

this book features research presented and discussed during the research innovation forum rii forum 2024 as such this book offers a unique insight into emerging topics issues and developments pertinent to the fields of technology innovation and education and their social impact papers included in this book apply inter and multi disciplinary approaches to query such issues as technology enhanced teaching and learning smart cities information systems cognitive computing and social networking what brings these threads of the discussion together is the question of how advances in computer science which are otherwise largely incomprehensible to researchers from other fields can be effectively translated and capitalized on so as to make them beneficial for society as a whole in this context rii forum and rii forum proceedings offer an essential venue where diverse stakeholders including academics the think tank sector and decision makers can engage in a meaningful dialogue with a view to improving the applicability of advances in computer science
