there is a great gulf between the laws given by god to moses and those in force in society today so how does a believer live in the twenty first century what rules do they apply christians may claim that many of god s laws were fulfilled with the death and resurrection of jesus christ but if a believer truly wants to know who god is what makes him tick and how we are supposed to live then what better way than to study god s rules at their heart god s laws were about two things how to have a healthy relationship with him and how to build up a healthy thriving community as a consequence any search for keys to a godly life would be deficient if it did not include an examination of

the rules that god gave moses together with the insights of solomon

most classes of operators that are not isomorphic embeddings are characterized by some kind of a smallness condition narrow operators are those operators defined on function spaces that are small at 1 0 1 valued functions e g compact operators are narrow the original motivation to consider such operators came from theory of embeddings of banach spaces but since then they were also applied to the study

of the daugavet property and to other geometrical problems of functional analysis the question of when a sum of two narrow operators is narrow has led to deep developments of the theory of narrow operators including an extension of the notion to vector lattices and investigations of connections to regular operators narrow operators were a subject of numerous investigations during the last 30 years this monograph provides a comprehensive presentation putting them in context of modern theory it gives an in depth systematic exposition of concepts related to and influenced by narrow operators starting from basic results and building up to most recent developments the authors include a complete bibliography and many attractive open problems
