11 tables and 57 figures of which 1 is in full colour

this second volume in a short series on the glaucomas is devoted to the two main types of the disease open angle glaucoma and angle closure glaucoma the contents are based on observations and experience gained during the management of more than 40 000 hospital and 7 000 private patients with follow up of 10 to 50 years the book is comprehensive in scope all aspects of diagnosis are carefully examined surgical indications and techniques are explained and the role of medical treatment is evaluated importantly chapters are included on topics that are frequently overlooked in other books but are important to early diagnosis such as diurnal pressure curve hrt and non conventional perimetry this volume provides a wealth of information and includes almost 1000 illustrations the majority in color as well as an accompanying dvd of surgical techniques it will be an invaluable asset for all ophthalmologists

primary open angle glaucoma was the topic of the tenth world glaucoma association consensus meeting as with prior meetings it was a daunting task to seek and obtain consensus on broad subject matter that ranges from diagnosis risk profiling and screening of the disease as it is unclear how each of us decides how we practice and the evidence to guide us often is sparse this consensus as well as the others is based not only on the published literature but also on expert opinion although consensus does not replace and is not a surrogate for scientific investigation it does provide considerable value especially when the desired evidence is lacking the goal of this consensus is to provide a foundation for diagnosing and managing primary open angle glaucoma and how it can be best done in clinical practice identification of those areas for which we have little evidence and therefore the need for additional research always is a high priority we hope that this consensus report will serve as a benchmark of our understanding however this

consensus report is intended to be fluid it is expected that it will be revised and improved with the emergence of new evidence

authored by three prominent specialists in the field this text provides comprehensive coverage of diagnostic and treatment modalities for optimal glaucoma management revised throughout this new edition presents the latest guidance in clinical examination randomized trials medical treatment laser therapy and surgical procedures hundreds of illustrations with many classic black and white figures from the previous editions supplemented with new color images depict the features of glaucomas and step by step procedures for their management while expanded use of highlighted boxes lists and summary tables make the material easy to access evidence based and updated information on all aspects of the glaucomas including physiology genetics interventional trials and new surgical techniques offer a well rounded foundation of knowledge for making the most informed diagnoses and choosing the most effective course of treatment combines the cumulative experience of three prominent glaucoma specialists addressing a full range of clinical needs for practitioners of all levels for a uniquely written coherent perspective includes extensive references to current and historically important sources to provide comprehensive interpretation of the latest medical literature synthesizes a classical approach to the glaucomas based on seven earlier editions spanning over 40 years with the most up to date evidence based and epidemiologically derived classifications and outcomes coherently correlates with authoritative consensus documents on key areas of glaucoma drawn up by the world wide specialists of the world glaucoma association and reprinted in the text revamps traditional teachings on the angle closure glaucomas in concert with the newest international literature and technologies to keep you up to date on the latest advances illustrates detailed surgical interventions applicable to the complete spectrum of clinical settings from the developing world through contemporary operating rooms examines the newest and most promising developments in pharmacology laser and surgical advances for glaucoma management to enable you to choose the most effective patient approach illustrates invaluable but little known instruments for clinical and research diagnoses including optic nerve cupping scales bleb assessment instruments and more
