mario aguilar skillfully elegantly and clearly presents the life and thought of some of the major  
spiritual forces of our time as a starting point for his own compelling reflections on the relationship  
between contemplation and politics we need more books like this one professor ivan petrella  
university of miami contemplation and political action defined the lives and work of six of the most  
inspiring christian leaders of the twentieth century thomas merton ernesto cardenal daniel berrigan  
sheila cassidy desmond tutu and mother teresa each one embraced a silent purposeful life of prayer  
contemplation and conversation with god which the author contends was the very foundation for  
their public activism aguilar profiles these outstanding religious figures illustrating how their  
contemplation of god gave them courage and understanding not just to grow in personal holiness but  
to become one with god through responding to the needs of others it was their spiritual life that gave  
them the energy commitment and strength to help feed the hungry clothe the naked and liberate the  
oppressed even in the darkest most difficult times yet as aguilar shows it is not just a chosen few who  
are called to combine prayer with political action through the regular contemplation of god all  
christians can be empowered to work toward social transformation and a just world

religion plays a central role in a variety of social movements including many that are not explicitly  
faith based this book provides the first systematic analysis of the ways religion contributes to diverse  
movements for social change it draws on a variety of case studies from the us and globally to build an  
argument about religion s distinctive capacity to provide logistical support to inspire and legitimize  
activist practices to connect different spatial scales and to link big ideas to everyday experiences the  
book s analysis rests on three foundational arguments first and most fundamentally it is impossible to

understand movements for social change without analyzing the multiple ways that religion shapes their ideas communities and practices second religion is always in mutually transformative interaction with social and political forces and can never be entirely separated from them in social movements and in the public sphere more generally people interpret politics with values and concepts drawn from religion and understand their activism as spiritually meaningful this challenges the assumption that religion is a largely a private matter third scholars must treat religion as a relatively independent variable which actively shapes social processes just as it is shaped by them we cannot make sense of religion s role in social movements without acknowledging that religious institutions and traditions have to some extent a life of their own

is theology a dead corpse or living organism for uruguayan jesuit juan luis segundo 1925 1996 theology is dynamic freedom and existence for central themes segundo believed that theology should be transformative in human lives for a theology to be transformative there must be a connection to existence that is it must be existential yet most scholars have overlooked this assumption in critical analyses of liberation theology this prima facie connection to existence is distinguishable from existentialism as a school of philosophy by showing the significant existential dimension to segundo s theology assessing his work and contribution to twentieth century theology relates to freedom ecumenism the role of faith in society and the relationship between faith and ideologies

in this uniquely wide ranging book david craven investigates the extraordinary impact of three latin american revolutions on the visual arts and on cultural policy the three great upheavals in mexico 1910 40 in cuba 1959 89 and in nicaragua 1979 90 were defining moments in twentieth century life in the americas craven discusses the structural logic of each movement s artistic project by whom how and for whom artworks were produced and assesses their legacies in each case he demonstrates how the consequences of the revolution reverberated in the arts and cultures far beyond national borders the book not only examines specific artworks originating from each revolution s attempt to deal with the challenge of socializing the arts but also the engagement of the working classes in mexico cuba and nicaragua with a tradition of the fine arts made newly accessible through social transformation craven considers how each revolution dealt with the pressing problem of creating a dialogical art one that reconfigures the existing artistic resource rather than one that just reproduces a populist art to keep things as they were in addition the author charts the impact on the revolutionary processes of theories of art and education articulated by such thinkers as john dewey and paulo freire the book provides a fascinating new view of the latin american revolutionaries from artists to political leaders who defined art as a fundamental force for the transformation of society and who bequeathed new ways of thinking about the relations among art ideology and class within a revolutionary process

long needed thomas schubeck sis the first comprehensive assessment of the ethical import of this generation s most influential theological movement based on in depth interviews with key liberation theologians as well as comprehensive research schubeck offers a critical yet sympathetic evaluation of liberation theology s normative content by looking at how liberation theologians actually use their

foundational sources praxis social analysis and scripture after narrating its grassroots origins schubeck gauges the comprehensiveness and coherence of the work of a dozen theologians including gustavo Gutiérrez Juan Segundo Jon Sobrino and the late Ignacio Ellacuría José Míguez Bonino and others he reveals liberation theology's surprising diversity and its power to illumine method and such issues as poverty and power economic and political systems theory and practice violence national security and land reform no task is more important or more urgent than understanding how religious reflection can best engender social and global justice and schbeck's sustained analysis sets the terms his constructive critique may well prove a turning point in the assessment by both theologians and ethicists of the cogency and future of liberation theology
