lenin's writings from 1917 are a marvellous insight into the bolshevik leader's thinking in this crucial year 1917 witnessed a series of dramatic turns that propelled the bolsheviks the most revolutionary party in history from some 8 000 members to a mass force of 400 000 in just nine months following the february revolution lenin was forced to rearm the bolsheviks with a new perspective of socialist revolution with skilful tactics and a bold approach he presided over the growth of the party although the bolsheviks were driven underground in july and lenin branded a state criminal by the provisional government the failed coup by general kornilov in august transformed the situation by fighting in a united front against

kornilov the bolsheviks succeeded in winning a majority in the soviets under lenin s guidance outlined in this volume this victory prepared the way for the october revolution these selected writings draw out the invaluable role of the revolutionary party and its leadership they are an essential guide for those fighting for socialist revolution today

in 1848 revolutions broke out all over europe in france the habsburg and german lands and the italian peninsular this seminar study considers why the revolutions occurred and why they were so widespread the book offers a broad ranging investigation of the social economic and political circumstances which led to the revolutions of 1848 as well as an account of the revolutions themselves first published in 1981 and fully revised in 1991 the study has long established itself as one of the most accessible and valuable introductions to this complex subject

these essays arose out of lectures given in oxford to commemorate the 150th anniversary of the 1848 revolutions in europe authoritative yet readable and colourful they comprise judicious summaries of the existing state of knowledge as well as new insights and unfamiliar information the book also seeks to place the revolutionary events in their wider context apart from chapters covering the main centres of disturbance in france germany italy and the habsburg lands there are discussions of the situation in britain and russia which were affected but not convulsed by the disorders elsewhere of reactions in the united states of america of the symbolism of 1848 for the later democratic radical and socialist movements 1848 marked the first breakdown of traditional authority across much of the continent and as such is of profound significance in the development of modern european politics as a whole

1848 saw an unprecedented wave of revolutions the social order appeared shaken to its foundations even those countries like britain which did not experience revolutions endured severe political crises yet within months established elites were able to re assert themselves and to take advantage of their entrenched position within bureaucracies and armies this book seeks to analyse the causes of both revolution and reaction it aims to set political events with the context of a continent undergoing complex processes of transition from essentially pre industrial economic and social structures towards more modern urban industrial systems it considers why after 1848 except in the exceptional circumstances of war governments were better able to prevent the development of revolutionary movements

it was no coincidence that the civil war occurred during an age of violent political upheaval in europe and the americas grounding the causes and philosophies of the civil war in an international context andre m fleche examines how questions of national self determination race class and labor the world over influenced american interpretations of the strains on the union and the growing differences between north and south setting familiar events in an international context fleche enlarges our understanding of nationalism in the nineteenth century with startling implications for our understanding of the civil war confederates argued that european nationalist movements provided models for their efforts to establish a

new nation state while unionists stressed the role of the state in balancing order and liberty in a revolutionary age diplomats and politicians used such arguments to explain their causes to thinkers throughout the world fleche maintains that the fight over the future of republican government in america was also a battle over the meaning of revolution in the atlantic world and as such can be fully understood only as a part of the world historical context in which it was fought

the dramatic story of the interconnected revolutions that shattered the old european order and transformed the continent a fully nuanced portrait of a tumultuous year wall street journal in 1848 a torrent of revolutions ripped through europe crowds of working class radicals and middle class liberals in paris milan venice vienna prague budapest krakow munich and berlin toppled the old conservative regimes and began the task of forging a new order political events so dramatic had not been seen in europe since the french revolution of 1789 and would not be witnessed again until the revolutions of eastern and central europe in 1989 in 1848 historian mike rapport traces the roots of the revolutionary fervor and the explosive spread of violence across europe and reveals the many ways in which 1848 continues to shape the modern world

harold j laski saw world war two as a period of revolutionary change as profound as any in the modern history of the human race in his view the period s inner nature was as significant in its essentials as those which saw the fall of the roman empire the birth in the reformation of capitalist society or as in 1789 the final chapter in the dramatic rise of the middle class to power all of these were not revolutions made by thinkers though some of them may have foreseen its coming but of ordinary people who shaped the large outlines of the direction of these changes laski held that revolutions of our time have been rooted in all that goes to give its present character to our society we can recognize its advent and prepare for it in that event we might build a civilization richer and more secure than any of which we so far have knowledge or we may chose to resist its onset in which case it will appear to some future generation that our age has sought rather to sweep back the tides of the ocean than to oppose the decrees of men the curse of our social order is its persistent inequalities either we must find ourselves able to co operate in their removal or we shall move rapidly to conflict about them laski argues that the middle class must co operate with workers in essential revisions as the aristocracy was wise enough to do a century ago over the reform bill or violent revolution will be unleashed by means that transforms the ends of either party to the conflict in view this is the choice that lies before us just how accurate or wide of the mark laski was is brilliantly articulated in the critical introduction by sidney a pearson jr

the 21st century has witnessed a considerable and increasing number of political revolutions around the world this contradicts the popular belief

of many experts in the 1970s that revolutions occurred mainly in monarchies and empires instead the revolutions of this century have several new characteristics which call for a renewed analysis of the subject this handbook offers a comparative perspective on the new wave of revolutions of the last decade presenting case studies on the color revolutions the arab revolutions of 2010 2011 and the global wave of revolutions in 2013 2018 that spanned regions ranging from africa to the caucasus it offers a better understanding of the varied forms features and historical backgrounds of revolutions as well as their causes accordingly it highlights recent revolutions in their historical and world systems contexts the handbook is divided into seven parts the first of which examines the history of views on revolution and important aspects of the theory of revolution the second part analyzes revolutions within long term historical trends and in their world system contexts in turn the third part explores specific major revolutionary waves in history the fourth part analyzes the first revolutionary wave of the 21st century 2000 2009 the so called color revolutions while the fifth discusses the second wave the arab spring 2010 2013 as an important turning point the sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the arab spring and some revolutionary events from the third wave that began in 2018 the seventh and final part offers forecasts on the future of revolutions given its scope the book will appeal to scholars and students from various disciplines interested in historical trends sociopolitical change contentious politics social movements and revolutionary processes involving both nonviolent campaigns and political violence once again this volume demonstrates the kind of open minded systematic analysis that the field of revolutionary studies requires prof george lawson department of international relations australian national university canberra
