the language of creation is a commentary on the primeval stories from the book of genesis it is often difficult to recognize the spiritual wisdom contained in these narratives because the current scientific worldview is deeply rooted in materialism therefore instead of looking at these stories through the lens of modern academic disciplines such as sociology psychology or the physical sciences this commentary attempts to interpret the bible from its own cosmological perspective by contemplating the ancient biblical model of the universe the language of creation demonstrates why these stories are foundational to western science and civilization it rediscovers the archaic cosmic patterns of heaven earth time and space and sees them repeated at different levels of reality these fractal like structures are first encountered in the narrative of creation and then in the stories of the garden of eden cain and abel and the flood the same patterns are also revealed in the visions of ezekiel the book of daniel and the miracles of moses the final result of this contemplation is a vision of the cosmos centered on the role of human consciousness in creation

this handbook provides state of the art treatments of the central issues that arise from the study of the phenomena of bilingualism it explores topics ranging from the bilingual brain to bilingual education

with splc 2005 we celebrated the formation of a new conference series the international software product line conference splc which
