much has happened in the world in the 17 years since the first new views of the moon was published as volume 60 of the mineralogical society of america in 2006 an exciting new era of lunar exploration has begun including the promise of resuming human lunar exploration exploring the lunar poles and missions to many other high priority science targets it is fitting therefore to now summarize the current state of knowledge to the degree possible at a time when advancements in knowledge of the moon are proceeding at a breakneck pace therefore during this period of unprecedented lunar exploration activity and as we continue to rebound from a global pandemic we now happily announce this new views of the moon 2 volume summarizing the advances in lunar science and exploration since 2006 the steering committee is eternally grateful to all contributors and especially the chapter leads and to professor makiko ohtake university of aizu japan and dr david blewett johns hopkins university applied physics laboratory u s a for organizing the new views of the moon 2 electronic annex we deeply appreciate the hard work and dedication of everyone involved in the production of this volume especially rachel russell and ian swainson at the mineralogical society of america this volume helps to frame our knowledge and expectations for an exciting future of lunar science and exploration and the new discoveries to be made having humans return to the moon now seems more likely than it ever has since the last humans left the moon on 14 december 1972

the humanistic view of man is a scientific study designed to achieve a deeper comprehension of human phenomena the views of man held by the following five leading contemporary humanistic psychologists hubert bonner james bugental erich fromm abraham maslow and rollo may have been analyzed and synthesized comments on the synthesis have then been obtained from jacob bronowski a leading natural scientist his essay a twentieth century image of man provides further insight into his viewpoint the study

concludes with a discussion that highlights the distinctive uniqueness of the view of man held by the selected humanistic psychologists and points to the deeper inner powers that we must use to guide and energize us in our pursuit of a richer manifestation of our unlimited human wealth

engines of mischief explores the day to day labor economic political and social climate at the dawn of the industrial revolution in manchester england between 1817 and 1818 using new economic theories of the time parliamentary commissions and news reports students will engage with crucial issues of the day debating factory conditions and child labor the role of the government in the economy taxation workers unions and the extension of political rights down the social hierarchy in the game by assuming the roles of historical actors from various classes of society students are faced with choices about how to live and prosper during this period of great technological economic and social transformation will the working class violently resist new technology in factories form unions or join radical political clubs to improve their working conditions and protect their rights how best will middle class entrepreneurs run their enterprises will they provide fair treatment to their workers or simply maximize their profit how will the aristocrats maintain their power in government and society will they support the middle or the working classes

christopher alexander s series of ground breaking books including a pattern language and the timeless way of building have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns now in the nature of order alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities in the phenomenon of life the first volume in this four volume masterwork alexander proposes a scientific view of the world in which all space matter has perceptible degrees of life and sets this understanding of order as an intellectual basis for a new architecture with this view as a foundation we can ask precise questions about what must be done to create more life in our world whether in a room a humble doorknob a neighbourhood or even in a vast region he introduces the concept of living structure basing it upon his theories of centers and of wholeness and defines the fifteen properties from which according to his observations all wholeness is built alexander argues that living structure is at once both personal and structural taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart a step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united

this is the first published book length treatment on paul tillich and judaism which is a neglected aspect of tillich s thought it has three compelling features first pivotal biographical details show the importance of judaism for tillich and that he ardently opposed anti semitism before wwii and after the holocaust second tillich s theological method is examined in key primary sources to show how he maintains continuity between judaism and christianity the primary source analysis includes his 1910 and 1912 dissertations on schelling the 1933 the socialist decision the 1952 berlin lectures on the jewish question and his final public lecture on the importance of the history of religion for systematic theology particular attention is paid to his dialectical and theological history of religion third tillich s positive theology of judaism contrasts sharply with the many complex negative ways in which judaism is portrayed in western thought this contributes significantly to our understanding the evolving history of christian anti judaism

leo strauss's what is political philosophy addresses almost every major theme in his life's work and is often viewed as a defense of his overall philosophic approach yet precisely because the book is so foundational if we want to understand strauss's notoriously careful and complex thinking in these essays we must also consider them just as strauss treated philosophers of the past on their own terms each of the contributors in this collection focuses on a single chapter from what is political philosophy in an effort to shed light on both strauss's thoughts about the history of philosophy and the major issues about which he wrote included are treatments of strauss's esoteric method of reading his critique of behavioral political science and his views on classical political philosophy key thinkers whose work strauss responded to are also analyzed in depth plato al farabi maimonides hobbes and locke as well as twentieth century figures such as eric voegelin alexandre kojève and kurt riezler written by scholars well known for their insight and expertise on strauss's thought the essays in this volume apply to strauss the same meticulous approach he developed in reading others the first book length treatment on a single book by strauss leo strauss's defense of the philosophic life will serve as an invaluable companion to those seeking a helpful introduction or delving deeper into the major themes and ideas of this controversial thinker

bringing together ten utopian works that mark important points in the history and an evolution in social and political philosophies this book not only reflects on the texts and their political philosophy and implications but also their architecture and how that architecture informs the political philosophy or social agenda that the author intended each of the ten authors expressed their theory through concepts of community and utopian architecture but each featured an architectural solution at the centre of their social and political philosophy as none of the cities were ever built they have remained as utopian literature some of the works examined are very well known such as tommaso campanella's civitas solis while others such as joseph michael gandy's designs for cottages are relatively obscure however even with the best known works this volume offers new insights by focusing on the architecture of the cities and how that architecture represents the author's political philosophy it reconstructs the cities through a 3 d computer program archicad using artlantis to render plans sections elevations and perspectives are presented for each of the cities the ten cities are filarete sforzina albrecht dürer fortified utopia tommaso campanella the city of the sun johann valentin andreae christianopolis joseph michael gandy an agricultural village robert owen villages of unity and cooperation james silk buckingham victoria robert pemberton queen victoria town king camp gillette metropolis and bradford peck the world a department store each chapter considers the work in conjunction with contemporary thought the political philosophy and the reconstruction of the city although these ten cities represent over 500 years of utopian and political thought they are an interlinked thread that had been drawn from literature of the past and informed by contemporary thought and society the book is structured in two parts

the topic of sovereignty is contentious and one of enduring interest in a world of ever increasing economic globalisation the rise of supranational regulation and the interconnected age of information and communication technology among many other developments have challenged the once exclusively held westphalian model of sovereignty the distinction between the internal aspect of sovereignty as expressed in terms of ultimate authority in a constitution and the external aspect involving the relationship between sovereign states has been blurred this has given rise to contemporary debates that explore the theoretical and practical implications of current challenges to established doctrines evidently no book could encompass the entirety of the contemporary debates on sovereignty this is a book of essays focusing on sovereignty by a team of leading writers contributing domestic european and international perspectives the essays have been

written at a time of very great testing of the institutional frameworks at every level domestic european international or global the book illuminates the enduring strength of sovereignty as a foundational concept and the continuing widespread appeal of sovereignty as an idea
