my principal concern in this book is the way we talk about pictures renaissance

writers and artists imagined perspective quite differently than we do i maintain that renaissance authors and artists thought there were many compatible perspectives so that their writing and painting evince a pluralist approach in strict contrast to the monolithic mathematical perspective we imagine today theirs was more a collection of rational methods than a rationalisation of sight more a way of drawing objects than of setting them in an abstract pictorial space most important is the gradual recession of perspective as a mute method a practical subset of geometry and the growth of perspective as a metaphor a powerful concept for ordering our perception and accounting for our subjectivity preface

the years 1909-1930, the eleven-year presidency of the businessman-turned-politician Augusto B. Leguía mark a formative period of Peruvian modernity, witnessing the continuity of a process of reconstruction and the development of an intellectual and cultural tradition after a humbling defeat during the War of the Pacific (1879-1883). But these years were also fraught with conflict generated by long-standing divisions and new rivalries. A postwar generation of intellectuals and artists led by José Carlos Mariátegui and galvanized by left-wing thinking and an avant-garde aesthetic sought representation in the fields of politics and the arts to realize the modernizing potentialities opened up by a positivist oligarchy. New political and artistic conceptions raised their awareness of the fractured sense of nationhood in Peru and the need for a new project of nation formation based on a common political and cultural consciousness. Crucially, this gave rise to divergent political and artistic positions and practices. Mariátegui's indigenist Marxist politics and modernist-inspired poetics, through his influential journal *Amauta*, were pivotal in revitalizing, conciliating, and channeling those of his cohorts and challengers. Comprising six full-length chapters, a comprehensive introduction, and a conclusion, this monograph is ambitious in scope and depth. It provides fresh readings of key writings of Mariátegui, one of Latin America's most important and revolutionary political, cultural, and aesthetic theorists, through the lens of his poetics, emphasizing the value of this approach for a fuller understanding of his work's political meaning and impact. It does so through detailed analysis of the poetic expressive language employed in seminal political essays aimed at forging a new Marxist position in 1920s Peru. Furthermore, it

offers powerful and original critiques of under studied intellectuals of this time especially aprista futurists socialists and indigenists including female writers and artists such as magda portal Ángela ramos and julia codesido whose work he championed these readings are fully contextualized in terms of detailed critical study of complex sociopolitical conditions and positions and biographical intellectual backgrounds of mariátegui and his contemporaries this monograph underscores the fundamental importance of mariátegui in the development of political and artistic practices and projects that shaped a national shared yet also heterogeneous political culture and cultural tradition in peru during and after his lifetime

poetics is the study of the making of literary works of art in gospel studies in contrast to the dominant historical critical paradigm poetics regard the gospels as literature this approach is associated with a particular methodological movement narrative criticism petri merenlahti argues that poetics offer a vital critical tool to interpreters of the gospels but the approach must necessarily be historical recognising that perceptions of literary form and value are not fixed but evolve and develop from one time and culture to another far from being neutral these perceptions are integrally connected with ways of perceiving reality that reflect particular interests in human societies through methodological discussion and detailed analyses of gospel narratives this book introduces a comprehensive programme of historical poetics for gospel studies

in attempting to define a poetics of paradox from a traditional chinese standpoint james liu explores through a comparative approach linguistic textual and interpretive problems of relevance to western literary criticism liu s study evolves from a paradoxical view originating from early confucian and daoist philosophical texts that the less is said in poetry the more is meant such a view implied the existence of paradox in the very use of language and led traditional chinese hermeneutics to a study of metaparadox the use of language to explicate texts the meaning of which transcends language itself as liu illustrates elements of traditional chinese hermeneutics with examples of poetic and critical works he makes comparisons with the works of such western literary figures as shakespeare mallarme pound ionesco derrida and shepard the comparisons bring to light a crucial difference in conceptualization of language chinese critics especially those influenced by daoism and buddhism seem to have held a deitic view of language language points to things whereas western critics seem to have thought of language as primarily mimetic language represents things liu examines the consequences of these views showing how both offer insights into the meaning of text and to what extent both have led to a metaparadox of interpretation originally published in 1988 the princeton legacy library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of princeton university press these editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions the goal of the princeton legacy library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by princeton university press since its founding in 1905
