a wide ranging philosophical and practical guide to incorporating the wisdom of ancient philosophers into daily modern life what does life truly mean who do i want to become and how do i get there these are some of life's biggest questions that can be hard to think through fortunately a group of philosophers from ancient greece and rome have already done a lot of the heavy lifting drawing on the philosophies life lessons and experiences of key thinkers live like a philosopher will help you

navigate these existential waters with invaluable insights for modern life from finding balance with aristotle and embracing uncertainty with cicero to avoiding pain with epicurus and learning how to rebel with cynic hipparchia this is a powerful toolkit to help you navigate the highs and lows of modern life organized around three main themes of pleasure virtue and doubt there s something to learn from each master in this philosophical quest live like a philosopher is the helping hand we all need to make life better

the great discovery that no one wanted to make it s the dawn of the industrial revolution and euclidean geometry has been profoundly influential for centuries one mystery remains however euclid s fifth postulate has eluded for two thousand years all attempts to prove it what happens when three nineteenth century mathematicians realize that there is no way to prove the fifth postulate and that it ought to be discarded along with everything they d come to know about geometry jason socrates bardi shares the dramatic story of the moment when the tangible and easily understood world we live in gave way to the strange mind blowing world of relativity curved space time and more jason socrates bardi tells the story of the discovery of non euclidian geometry one of the greatest intellectual advances of all time with tremendous clarity and verve i loved this book john horgan author the end of science and rational mysticism an accessible and engrossing blend of micro biography history and mathematics woven together to reveal a blockbuster discovery david wolman author of righting the mother tongue and a left hand turn around the world

as someone who has spent forty years in psychology with a long standing interest in evolution i ll just assimilate howard bloom s accomplishment and my amazement david smillie visiting professor of zoology duke university in this extraordinary follow up to the critically acclaimed the lucifer principle howard bloom one of today s preeminent thinkers offers us a bold rewrite of the evolutionary saga he shows how plants and animals including humans have evolved together as components of a worldwide learning machine he describes the network of life on earth as one that is in fact a complex adaptive system a global brain in which each of us plays a sometimes conscious sometimes unknowing role and he reveals that the world wide is just the latest step in the development of this brain these are theories as important as they are radical informed by twenty years of interdisciplinary research bloom takes us on a spellbinding journey back to the big bang to let us see how its fires forged primordial sociality as he brings us back via surprising routes we see how our earliest bacterial ancestors built multitrillion member research and development teams a full 3 5 billion years ago we watch him unravel the previously unrecognized strands of interconnectedness woven by crowds of trilobites hunting packs of dinosaurs feathered flying lizards gathered in flocks troops of baboons making communal decisions and adventurous tribes of protohumans spreading across continents but still linked by primitive forms of information networking we soon find ourselves reconsidering our place in the world along the way bloom offers us exhilarating insights into the strange tricks of body and mind that have organized a variety of life forms spiny lobsters which during the paleozoic age participated in communal marching rituals and bees which during the age

of dinosaurs conducted collective brainwork this fascinating tour continues on to the sometimes brutal subculture wars that have spurred the growth of human civilization since the stone age bloom shows us how culture shapes our infant brains immersing us in a matrix of truth and mass delusion that we think of as reality global brain is more than just a brilliantly original contribution to the ongoing debate on the inner workings of evolution it is a grand vision says the eminent evolutionary biologist david sloan wilson a work that transforms our very view of who we are and why
