consciousness is the major unsolved problem in biology written as an introduction to the field and drawing upon clinical psychological and physiological observations this book seeks to answer questions of consciousness within a neuroscientific framework

building upon insights from the sixteenth century neo confucian wang yang ming the american pragmatist john dewey and the process philosopher alfred north whitehead this book argues that knowledge is best understood as a form of action many of the most puzzling philosophic problems in the modern era can be traced to our tendency to assume that knowledge is separate from action letting go of the sharp knowledge action distinction however makes possible a more coherent theory of knowledge that is more adaptive to the way we experience one another the world and ourselves by responding directly to problems raised by contemporary thinkers like charles taylor donald davidson richard rorty daniel dennett mark johnson george lakoff and robert neville this book maps out a strategy for

making progress in the contemporary quest for a nonrepresentational theory of knowledge

the eternal silence at the core of our being can manifest itself as inner awareness or as a source of inspiration for our active lives meditation is a path that allows us not only to grow inwardly but also to develop maturity and perfect our outer lives to answer the question what are you doing with your life we must first examine the role our mind plays in guiding our thoughts and actions this book explores the role of the mind in our lives and offers strategies for achieving inner silence drawing inspiration from the methods of raja yoga kriya yoga tantra yoga and the yoga of sri aurobindo it thus complements the first volume devoted to mastering the life force prana and explores the evolution of consciousness as the origin means and ultimate goal

as an introduction to the work of renowned philosopher eric voegelin consciousness and transcendence stands out as the first book to examine voegelin s work from a theological perspective although voegelin considered himself a philosopher the incorporation of

christian theological themes is pervasive throughout his work and in this volume michael p morrissey clearly illustrates that voegelin s thought is as relevant to theology as it is to the disciplines philosophy history and political science in which it has traditionally been confined morrissey focuses on and traces the development of voegelin s theory of consciousness demonstrating that it makes a tremendous theological contribution but also presents a radical challenge to theology this challenge is based on the nature of voegelin s method of meditative experiential exegesis voegelin s lifelong search for order in both its transcendent and immanent dimensions was truly an interdisciplinary inquiry into the nature of reality and as such it serves as an integrative model of what the human sciences are truly about in an age of dogmatism and ideology consequently morrissey illustrates voegelin s thought not only results in a reunification of philosophy and theology it also succeeds in reconstructing theology on a broader and deeper scale of inquiry than is generally practiced today consciousness and transcendence includes a lengthy comparison of voegelin s thought to that of another seminal thinker jesuit theologian bernard lonergan and is the only book that focuses on voegelin s last writings for those who are new to voegelin s thought this volume serves as an up to date introduction to his challenging body of work for those already familiar with voegelin it provides elucidation and commentary on his most important ideas and concepts especially in regard to his later more theological writings
