this book constitutes the refereed proceedings of the 21st european symposium on programming esop 2012 held in tallinn estonia as part of etaps 2012 in march april 2012 the 28 full papers presented together with one full length invited talk were carefully reviewed and selected from 92 submissions papers were invited on all aspects of programming language research including programming paradigms and styles methods and tools to write and specify programs and languages methods and tools for reasoning about programs methods and tools for implementation and concurrency and distribution

behavioral language and reasoning are expressions of neural functions par excellence as the brain must draw on sensory modalities to gather information on the rest of the body and on the outer world cortical areas processing the identity and location of the sensory inputs were once thought to be organized with some branches dedicated to complex features yet current studies have uncovered synergistic effects at early stage cognitions as well as higher level association areas a less hierarchical functional architecture of the brain has emerged such that irrespective of sensory modality inputs are assigned to the best suited cortical substrate

this book features papers presented at iih msp 2018 the 14th international conference on intelligent information hiding and multimedia signal processing the scope of iih msp included information hiding and security multimedia signal processing and networking and bio inspired multimedia technologies and systems the book discusses subjects related to massive image video compression and transmission for emerging networks advances in speech and language processing recent advances in information hiding and signal processing for audio and speech signals intelligent distribution systems and applications recent advances in security and privacy for multimodal network environments multimedia signal processing and machine learning presenting the latest research outcomes and findings it is suitable for researchers and students who are interested in the corresponding fields iih msp 2018 was held in sendai japan on 26 28 november 2018 it was hosted by tohoku university and was co sponsored by the fujian university of technology in china the taiwan association for intelligence consortium in taiwan and the swinburne university of technology in australia as well as the fujian provincial key laboratory of big data mining and applications fujian university of technology and the harbin institute of technology shenzhen graduate school in china

the classical geometries of points and lines include not only the projective and polar spaces but similar truncations of geometries naturally arising from the groups of lie type virtually all of these geometries or homomorphic images of them are characterized in this book by simple local axioms on points and lines simple point line characterizations of

lie incidence geometries allow one to recognize lie incidence geometries and their automorphism groups these tools could be useful in shortening the enormously lengthy classification of finite simple groups similarly recognizing ruled manifolds by axioms on light trajectories offers a way for a physicist to recognize the action of a lie group in a context where it is not clear what hamiltonians or casimir operators are involved the presentation is self contained in the sense that proofs proceed step by step from elementary first principals without further appeal to outside results several chapters have new heretofore unpublished research results on the other hand certain groups of chapters would make good graduate courses all but one chapter provide exercises for either use in such a course or to elicit new research directions
