you may have heard that one third of the bible is made up of prophecy but after reading this book you will have no doubt the bible is one hundred percent prophecy what if you could learn how all the events described in the bible from the old testament to the new testament were actually telling us about god s plan for the future god s timeline for mankind will forever change the way you view the events in the bible author dwain huntington first looks into the lives of the hebrews in the old testament to show you how their stories are repeating themselves today in modern israel then you will be taken on a journey through the ages exploring the way events in the heavens repeated themselves on the earth ultimately you will learn about how the fall of mankind has been met with god s grace and his restoring powers of redemption what has happened before will happen again and god shows us this pattern in his prophetic word god s timeline for mankind gives us great insights into just how these events will affect the lives of those living during what will be the most difficult time this earth will ever see

he was the overflowing emperor of the business world but he doted on her instantly turning into a berserk beast of his wife the former boyfriend kept pestering her causing the ceo to be extremely unhappy he brought her along to the whole world to proclaim that she was his woman ceo leng i m so pure and cute what if someone else falls for me and snatches it away he held her in his arms and said tyrannically you dare hit me

this is a book of history ethics and philosophy it is a record of teachings passed down through the generations from the east and the west it contains the fullness of the sealed covenant established between man and the laws of the universe as we evolve as a race we take things out of our lives because we better understand who we are and what we have achieved the divine refers to the laws of nature and the universe that guide us in our everyday lives the creator that guides our everyday lives is not something that we should worship or pray to out of fear or love it is something that remains unseen and works in natural forces to explain all the events that happen on earth it is merely a force and it is not necessary to belong to a group to experience the light the path to the light is straight and broad the creator of the universe is a divine and intellectual force by which all things came into being the sealed covenant is a pact between all of humanity to the world around us and the universal laws that guide our everyday lives to come together and love one another and come to make the world a better place for all people this shall usher in the evolution of religious traditions and humanity to a new age of prosperity

a highly original theory of how the mind brain works based on the author s study of single neuronal cells in i of the vortex rodolfo llinas a founding father of modern brain science presents an original view of the evolution and nature of mind according to llinas the mindness state evolved to allow predictive interactions between mobile creatures and their environment he illustrates the early evolution of mind through a primitive animal called the sea squirt the mobile larval form has a brainlike ganglion that receives sensory information about the surrounding environment as an adult the sea squirt attaches itself to a stationary object and then digests most of its own brain this suggests that the nervous system evolved to allow active movement in animals to move through the environment safely a creature must anticipate the outcome of each movement on the basis of incoming sensory data thus the

capacity to predict is most likely the ultimate brain function one could even say that self is the centralization of prediction at the heart of Ilinas s theory is the concept of oscillation many neurons possess electrical activity manifested as oscillating variations in the minute voltages across the cell membrane on the crests of these oscillations occur larger electrical events that are the basis for neuron to neuron communication like cicadas chirping in unison a group of neurons oscillating in phase can resonate with a distant group of neurons this simultaneity of neuronal activity is the neurobiological root of cognition although the internal state that we call the mind is guided by the senses it is also generated by the oscillations within the brain thus in a certain sense one could say that reality is not all out there but is a kind of virtual reality
