modern science can speak with authority regarding only a tiniest fraction of the earth s interior we have quite literally scratched just the surface of our planet can we truly know what lies beneath our feet in the unimaginably deep depths of the earth can the phenomenon of spiritual investigation add to this question in this comprehensive volume with notes and an introduction rudolf steiner s utterances on this theme have been brought together for the first time under one cover his unique overview gives a picture of the nine layers of the earth as they become visible via the research of the spiritual scientist the layers range from the familiar mineral on which we live to the innermost core which steiner connects to human and animal powers of reproduction in between are layers such as the mirror earth which represents qualities of extreme evil and the fire earth which is connected to natural catastrophes the information steiner conveys is never abstract or theoretical but intimately related to the human being the fire earth for example is acutely affected by people s will when the human will is chaotic and untutored says steiner it acts magnetically on this layer and disrupts it leading to volcanic eruptions he also describes other natural catastrophes such as extreme weather and earthquakes in connection to the interior of the earth and karma

this interpretation caused important roots in occult esoteric traditions to be repressed this process of purification labour is not to be equated with the origin of the academic studies de facto the elimination of idealistic theories took time and only happened later one example concerning the early entanglement is tibetology where many researchers and respected chair holders were influenced by theosophical ideas or were even members of the theosophical society similarly the emergence of comparatistics cannot be understood without taking into account perennialist ideas of esoteric provenance which hold that all religions have a common origin in this perspective it is not only the history of religious studies which must be revisited but also the partial shaping of religious studies by these traditions insofar as it saw itself as a counter model to occult ideas
