the concept of alienation is an umbrella concept that includes powerlessness meaninglessness social isolation cultural estrangement and self estrangement for researchers the study of alienation is a three fold task first understanding the discrepancy between individual values and actions and general living and working conditions second analyzing the overt and latent forms of oppression in social structures third accounting for social circumstances that hinder or facilitate individual or collective action against those alienating structures alienation society and the individual provides a timely and broadly representative overview of the most recent developments in alienation research and theory alienation society and the individual makes it clear that alienation research has come of age further theoretical developments remain important and as demonstrated in this volume which revives theoretical debate so as to reformulate classical concepts in view of developments in modern society the concept of alienation is now increasingly applied to empirical research in a variety of fields included here are theory driven evaluations of empirical research on migrant workers as well as comparative studies on differing liberation ideologies in south africa this volume reflects the effects of political developments in eastern europe on marxist alienation theory while marxist theory remains important it is no longer directed exclusively toward criticism of capitalist society new applications include a critique of eastern european state socialism analysis of consumer rather than capitalist society and uncommon examples of empirical research carried out within a marxist framework the book concludes with a chapter that evaluates recent theoretical and methodological innovations and sets priorities for future research alienation society and the individual offers an unusual combination of theory and practice that make it a state of the art volume it will be read by sociologists political scientists social psychologists philosophers and anthropologists

the original papers which appear in this volume were initially presented in a series of sessions of the ad hoc group on alienation theory and research at the 1974 world congress of sociology in toronto canada this group was organized by the editors as a result of their longstanding research and teaching interest in the field the purpose of the toronto sessions was to provide an international forum where scholars and researchers could come to gether for a personal exchange of ideas and research findings to our know ledge this was the first forum of its kind concerned specifically with aliena tion theory and research more

than fifty theoretical and empirical papers from thirteen countries and several overlapping disciplines were organized into panels and workshops during the span of four days the response to these sessions indicates that interest in the study of alienation by philosophers and social scientists continues unabated the toronto sessions were organized largely around a fundamental concern for further theoretical development and conceptual clarification in the alienation field the papers selected for this volume reflect this thematic concern although many excellent empirical papers were presented it was generally felt that meaningful empirical research would benefit from a continued elaboration and refinement of alienation theory the present collection is consequently geared to problems of meaning theory and method considerable emphasis is also placed on a critical evaluation of the alienation theme as it has evolved from social philosophy to empirical social research

finally a prescription for overcoming alienation is provided in terms of socialization and the development of freedom and rationality for every individual book jacket

the first edition of this seminal book in 1971 pointed out the fatal defects of marxist theory that would lead to the collapse of the soviet economy in this revised edition paul craig roberts examines how reality triumphed over marxist theory and the implications for the future of russia and eastern europe in 1971 roberts created a firestorm among professional sovietologists by proclaiming that the economies of the ussr and its east bloc allies were doomed because their planned economies were in reality anything but planned expanding on his original ideas roberts demonstrates in this book the fatal shortcomings of marxist economies ranging from misallocation of resources to ersatz capitalistic concepts grafted onto a system that calls for production without regard to profit roberts argues that the economies of the nations emerging from the ussr s collapse must grasp the profound truths in this book if they are to become viable

from science to emancipation alienation and the actuality of enlightenment is the second of three books elaborating roy bhaskar s new philosophy of metareality which appeared in rapid succession in 2002 with a new introduction from mervyn hartwig this book contains some of the original transcripts and the questions and answers they provoked from a variety of lecture and workshop tours roy bhaskar presented for indian audiences before this book was first published because of the spontaneous and informal nature of these talks and discussions this book continues to provide the most immediate and accessible

introduction to roy bhaskar s philosophy as it charts his intellectual journey the talks recorded here have retained an immediate local but also deeply universal interest from science to emancipation provides an indispensable resource for all students of philosophy and the human sciences

alienation has objective social structural determinants yet is experienced subjectively as a psychological state involving both emotion and cognition part i considers conceptualizations of alienation and affect in historical context emphasizing rousseau hegel marx simmel and weber part ii develops a theory of the affective bases of seeman s original five varieties of alienation normlessness meaninglessness self estrangement cultural estrangement and powerlessness the book argues that both normlessness and cultural estrangement manifest in two distinct forms and involve distinct emotions thus it develops the affective bases of seven distinct varieties of alienation this work synthesizes classical and contemporary alienation theory and the sociology of emotions it contributes to political sociology and finds application in social psychiatry and related health and social service fields that treat traumatized and highly alienated individuals
