examines goethe's neglected but sizable body of scientific work considers the philosophical foundations of his approach and applies his method to the real world of nature

whereas most readers are familiar with goethe as a poet and dramatist few are familiar with his scientific work in this brilliant book henri bortoft who began his studies of goethean science with j g bennett and david bohm introduces the fascinating scientific theories of goethe he succeeds in showing that goethe's way of doing science was not a poet's folly but a genuine alternative to the dominant scientific paradigm bortoft shows that a different gentler kind of empiricism is possible than that demanded by the dualizing mind of modern technological science and demonstrates that goethe's participatory phenomenology of a new way of seeing while far from being a historical curiosity in fact proposes a practical solution to the dilemmas of contemporary postmodern science if you read only one book on goethan science this should be the one

johann wolfgang von goethe is most famous for his work on color theory but he was also an accomplished all round scientist studying and writing on anatomy geology botany zoology and meteorology this book draws together in goethe's own words his key ideas on nature science and scientific method goethe believed that we should study our world and nature as people at home in it rather than removedly as if we were aliens from another planet he adopted a qualitative approach to science at odds with newton's quantitative methods that were so popular in his day his is a sensitive science which does not ignore our relationship to nature the extracts in this book are fascinating and essential reading for anyone who feels that we've lost our spiritual connection to

nature

this volume looks to core ideas defining goethe's work and his influence on his contemporaries and inheritors contributions to this volume explore his impact through ideas of organic and aesthetic formation methods of biology reason becoming and bildung modes of self conscious comportment to nature art and the self and conceptions of finitude and divinity this volume underscores the interdisciplinary impact of goethe's thought and work of particular note is goethe's unified and non reductive account of nature human education social life and reason these contributions shed light on how goethe's thought furthers the methodological sciences of his day while yielding resources for the grounding of theories of art in principles of idealism as well as imminent critiques of idealism through insights about organic formation and activity the result is a compelling sense of unity through plurality contributors james conant richard eldridge camilla flodin michael forster gerad gentry keran gorodeisky johannes haag joel lande lara ostaric mattias pirholt anne pollok karin schutjer allen speight joan steigerwald violetta waibel david wellbery

a new york times book review editors choice selection named one of the best books of the year by the economist and kirkus reviews this splendid biography wall street journal of goethe presents his life and work as an essential touchstone for the modern age a masterful intellectual portrait goethe life as a work of art is celebrated as the seminal twenty first century biography of the writer considered to be the shakespeare of german literature johann wolfgang von goethe 1749 1832 a remarkably prolific poet playwright novelist and as rüdiger safranski emphasizes a statesman and naturalist first awakened not only a burgeoning german nation but the european continent with his electrifying novel the sorrows of young werther safranski has scoured goethe s entire oeuvre relying exclusively on primary sources including his correspondence with contemporaries to produce a fresh and authentic economist portrait of the avatar of the romantic era skillfully blending artistic analysis with swift sharp renderings of the great political and intellectual figures goethe encountered safranski s portrait of the prolific genius leaves the reader with lasting awe even envy of a monumental legacy the new yorker as safranski ultimately shows goethe s greatest creation even in comparison to his masterpiece faust was his own life

sebastian luft presents and defends the philosophy of culture championed by the marburg school of neo kantianism following a historical trajectory from hermann cohen to paul natorp and through to ernst cassirer this book makes a systematic case for the viability and attractiveness of a philosophical culture in a transcendental vein in the manner in which the marburgers intended to broaden kant s approach in providing a philosophical study of culture luft adheres to important kantian tenets while addressing empirical studies of culture the space of culture culminates in an exploration of cassirer s philosophy of symbolic forms and argues for the extent to which cassirer s thought was firmly rooted in the marburg school despite his originality at the same time it shows how cassirer opened up the philosophical study of culture to new horizons making it attractive for contemporary philosophy

When somebody should go to the books stores, search initiation by shop, shelf by shelf, it is in point of fact problematic. This is why we present the books compilations in this website.
