this book aims at explaining romantic love between straight adults through literary texts of the western canon from the nineteenth and twentieth century each chapter comes with a multidisciplinary approach in which protagonists are mutilated in their quest for loving as alternative to annihilation the book emphasizes love as an obsession thus as an exploration of the mind from the passion myth of tristan and isolde to the nihilist modernist representations the western world has created a perverse concept of love a love for nothingness for death narcissistic and at times destructive love is gained by overcoming obstacles if without obstacles there is no love then love becomes love for obstacles within this masochistic frame love falling in love being loved always stand at the edge of pathology at its core this book narrates a love story more precisely a story of loves the haunting evocation of a desire that by its very nature cannot be fulfilled inherent in the nature of love is a subtle dialectical activity between presence and absence between creation and destruction reality and void accordingly the narrative raises questions that the past two centuries were incapable of answering does love only last the time of a kiss is its promise fatally destined to dissolve what about violence physical emotional temporal is it an ineliminable part of love or its most extreme profanation and what is the mystery that accompanies loves that know how to last without resigning themselves to the death of desire it is to answer some of these questions that i wrote this text love is an unconscious process that dominates reason and destroys it when reason cannot be a mode of communication hence the amorous romance is madness and this text is written as a loud reminder
