the geologically ancient tidewater region of southeastern virginia and northeastern north carolina rests precariously atop millions of years of erosion from the nearby appalachian mountains an immense wetland at near sea level it is host to every conceivable body of fresh water ranging from brooding swamps and large hidden lakes to sluggish blackwater rivers and brackish sounds one of which was so large an early explorer thought he had found the pacific ocean in this engaging book biologist and tidewater native roy t sawyer delivers an ecohistory of this unique waterland whose wind driven tides cover a rich human and natural past jutting prominently into the atlantic this wetland is the final stop for the warmth of the gulf stream before it is deflected from the american mainland at the top of a narrow warm coastal strip it provides an ideal home for a vast array of animal and plant life including prodigious numbers of reptiles such as the world s northernmost population of alligators and overwintering waterfowl it is also home to the oldest known living trees east of the rocky mountains the climate and geography made the area a natural choice for very early human habitation as far back as the last ice age when the region was a rich oasis just south of a veritable tundra in examining the impact of humans upon this environment and vice versa sawyer reveals how our alarming shortsightedness has produced a fragile and endangered present although human manipulation started here as early as ten thousand years ago coinciding with extinction of mammoths and other megafauna the environment has been altered most radically over only the last one hundred years particularly in regard to land drainage deforestation overfishing and pollution the author provides an authoritative overview of the human impact on these wetlands and suggests ways in which we might still salvage them in so doing he explores the effects of hurricanes droughts forest fires and ice ages of the past and anticipates in this age of global warming natural events that may be still to come
