this is a deconstruction of a selection drawn from the collected works of xi jinping from 2012 to 2017 specifically dealing with xi jinping s discourse of socialism with chinese characteristics for the new era for xi jinping new era is the historical epoch in which china has to attain its two centenary goals of becoming a moderately prosperous society by 2022 and attaining the rejuvenation of china the chinese dream by 2049 this process is impacted by specific grave difficult and some intractable problems which must be mitigated in order to attain the two centenary goals from 2012 to 2017 xi jinping reveals in great detail his discourse worldview and plan of action to mitigate these problems and attain the two centenary goals xi jinping insists that a new model of development and governance is demanded to attain especially the chinese dream which amounts to building a new china markedly different from the two development models that preceded the new era the departure point of xi jinping s model is the new governance rooted in the hegemony of law over the social order including the party xi jinping has then an order of power that underpins this new development and governance model that is a departure from those of the two preceding models the vision of xi jinping s discourse of socialism with chinese characteristics for the new era is a signal to all nations seeking to end underdevelopment and neo colonial domination compulsory reading for all of us seeking liberation from domination exploitation and underdevelopment in the 21st century

the war in afghanistan came to an end in 2014 after nearly thirteen years of conflict throughout that period british officials have described uk operations there in various conflicting and often contradictory ways as a counter terrorism mission a stabilisation mission and a counter narcotics mission respectively this book investigates how the war was sold to the british public and how britain s transnational foreign and defence policy impacted on the unfolding of uk strategy in afghanistan and the way it was communicated it argues that because the uk s foreign and defence policy is transnationally oriented meaning that it is foundationally aimed at maintaining alliance with the united states and the institutional coherence of nato uk strategy is contingent upon collective security and crucially is fundamentally concerned with the means of policy maintaining alliances over the ends using alliances to effect change explaining the inalienability of collective security systems to national security is no easy task however and when faced with the adversities of afghanistan the uk state has since 2008 instead opted to describe the significance of afghanistan in narrow nation centric counter terrorist concerns in order to maintain public support for collective security operations there whilst paradoxically framing the conflict in a manner that

avoids talking about the transnational structure and purpose of the mission this kind of strategic communication is increasingly becoming a focus of the uk state as it faces a transnational dilemma of maintaining its collective security bonds whilst facing a public increasingly sceptical of liberal interventionism
