the field of special needs education is well established and although it continues to develop in exciting and controversial ways involving some of education's leading thinkers many people feel it is lacking a coherent theoretical analysis of its own students and practitioners looking for some solid theory to reinforce their own study or practice commonly have to borrow from other disciplines such as psychology and sociology since there has been no attempt to provide a theoretical foundation for the special needs community this book does exactly that bringing together contributions from key names in the field from uk and beyond the book will establish itself as an essential text for students and teachers as well as all those involved in special needs across the social sciences

this field of special education has been through marked changes in recent years with the emergence of notions such as inclusive schooling and entitlement curricula this book brings together contributions from the uk and beyond

disability and the politics of education an international reader is a rich resource that deals comprehensively with the many aspects of the complex topic of disability studies in education for nearly two decades global attention has been given to education as a human right through global initiatives such as education for all efa and the salamanca statement yet according to unesco reaching the goals of efa remains one of the most daunting challenges facing the global community today millions of the world's disabled children cannot obtain a basic childhood education particularly in countries with limited resources even in the wealthiest countries many disabled children and youth are educationally segregated from the nondisabled particularly if they are labeled with significant cognitive impairment international

agencies such as the United Nations and the World Bank have generated funds for educational development but unfortunately these funds are administered with the assumption that West is best thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness. This McDonaldization of education reproduces the labeling, resource allocation and social dynamics long criticized in disability studies. The authors in this volume explore these subjects and other complexities of disability and the politics of education in doing so they demonstrate the importance and usefulness of international perspectives and comparative approaches.

Inclusive education is the term now being used to incorporate special needs into mainstream education. This selection of papers, divided into three sections, provides different perspectives, dialogue on inclusive education from around the world. The book defines the philosophical, political, educational, social implications of inclusion, maps out the dilemmas facing it, examples of good practice for the future are provided with detailed referencing.

A topical and provocative volume that invites consideration of the most fundamental issues concerning future educational provision: what is the purpose of our schools and what should we do in them? Cutting edge research by contributors who are leading figures internationally in philosophy and education. For whom these issues have been particular points of concern, includes a substantial keynote essay by leading philosopher of education Richard Pring, which is the springboard for the complementary essays that follow. Engages with questions Pring raises under five themes: defending and questioning the comprehensive ideal, common schools in multicultural societies, common schools and religion, school choice and the comprehensive ideal, and common schools and inclusion. Dedicated to the memory of Terence H. McLaughlin, whose tireless pursuit of the philosophical questions and challenges raised by the common school and the comprehensive ideal is emulated in

in this book the authors look behind special education to its supposed intellectual foundations they find a knowledge jumble constructed of bits and pieces from piagetian psychoanalytic psychometric and behavioural theoretical models they examine the consequences of these models influence for professional and popular thinking about learning difficulty in turn they explore and critique the results of this dominance for our views about children who are different and for the development of special education and its associated professions in the light of this critique they suggest that much of the knowledge of special education is misconceived and they proceed to advance a powerful rationale for inclusion out of ideas about stakeholding social justice and human rights concluding that inclusion owes more to political theory than to psychology or sociology the authors suggest that a rethink is needed about the ways in which we come by educational knowledge this is important reading for students of education and for teachers advisers and educational psychologists book jacket title summary field provided by blackwell north america inc all rights reserved
