of causation and the principle of sufficient reason by stressing the subjectivity of our reasoning powers and clarifying these in relation to an independent external reality it develops and elaborates a notion of the noosphere within a theoretical system this enables the notion to assume a scientific importance which it currently lacks because it is treated as an isolated eccentric and rather mystical idea

this review volume consists of a set of chapters written by leading scholars most of them founders of their fields it explores the connections of randomness to other areas of scientific knowledge especially its fruitful relationship to computability and complexity theory and also to areas such as probability statistics information theory biology physics quantum mechanics learning theory and artificial intelligence the contributors cover these topics without neglecting important philosophical dimensions sometimes going beyond the purely technical to formulate age old questions relating to matters such as determinism and free will the scope of randomness through computation is novel each contributor shares their personal views and anecdotes on the various reasons and motivations which led them to the study of randomness using a question and answer format they share their visions from their several distinctive vantage points

e mc2 is known as the most famous but least understood equation in physics this two volume textbook illuminates this equation and much more through clear and detailed explanations new demonstrations a more physical approach and a deep analysis of the concepts and postulates of relativity volume ii contains notably in special relativity complementary explanations alternative demonstrations relying on more advanced means and revealing other aspects further topics accelerated objects and the relativistic force nuclear reactions the use of hyperbolic trigonometry the lagrangian approach the relativistic maxwell s equations in general relativity tensors the affine connection the covariant derivative the geodesic equation the schwarzschild solution with two of its great consequences black holes and the bending of light further axiomatic considerations on time space matter energy and light speed in cosmology the flrw metric the friedman equation the cosmological constant the four ideal cosmological models these subjects are presented in a concrete and incremental manner and illustrated by many case studies the emphasis is placed on the theoretical aspects with rigorous demonstrations based on a minimum set of postulates the mathematical tools dedicated to relativity are carefully explained for those without an advanced mathematical background both volumes place an emphasis on the physical aspects of relativity to aid the reader s understanding and contain numerous questions and problems 147 in total solutions are given in a highly detailed manner to provide the maximum benefit to students this textbook fills a gap in the literature by drawing out the physical aspects and consequences of relativity which are otherwise often second place to the mathematical aspects its concrete focus on physics allows students to gain a full understanding of the underlying concepts and cornerstones of relativity

realism and the aim of science is one of the three volumes of karl popper s postscript to the logic of scientific discovery the postscript is the culmination of popper s work in the philosophy of physics and a new famous attack on subjectivist approaches to philosophy of science realism and the aim of science is the first volume of the postcript popper here formulates and explains his non justificationist theory of knowledge science aims at true explanatory theories yet it can never prove or justify any theory to be true not even if is a true theory science must continue to question and criticise all its theories even those that happen to be true realism and the aim of science presents popper s mature statement on scientific knowledge and offers important insights into his thinking on problems of method within science
