this book provides invaluable information support and guidance on educating a child with fragile x background on the origins of this syndrome and what the implications are for such a child s teaching and learning

this book contains the results of research projects carried out in relation to multigrade teaching in australia and south africa research in multigrade contexts is not commonly reported and rarely in book form the research results have implications for multigrade teachers government education personnel and university

teacher educators the book also contains chapters with practical advice for multigrade teachers including examples of multigrade teaching used in an Australian seven grade class kindergarten to grade 6 other chapters contain suggestions for practical strategies a multigrade teacher can use to reduce the workload involved in planning for multiple grades very little is published in the area of multigrade teaching yet the number of multigrade schools worldwide is huge developed countries still have a significant proportion of multigrade schools commonly one fifth to one third of all primary schools or classes despite decades of centralisation of schools and expansion of transport networks the number of these schools remains high mostly in rural areas developing countries established multigrade schools in rural areas in order to achieve the UN Millennium Development goal of universal primary education yet specific training to teach a multigrade class remains virtually non-existent in initial teacher education programs worldwide the value of this book is thus to report specific research carried out in multigrade contexts but also to provide practical help for multigrade teachers this help is needed as the teachers strive to achieve the UN Sustainable Development goal of a quality education through helping their students develop the skills and behaviours required for 21st century learning

advances in dating Australian rock markings papers from the first Australian rock picture dating workshop

the purpose of the monograph is to provide empirical data about mathematics achievement of secondary students in Australia in 1964 and 1978 the data were drawn from Australia wide surveys conducted at two levels 13 year old students and year 12 mathematics students the tests used for surveys were originally prepared by the International Association for the Evaluation of Educational Achievement IEA for cross national studies of achievement in mathematics in addition to measuring mathematics performance the studies analysed the mathematics curriculum in order to demonstrate how the changes in performance were linked to the changes in curriculum and in other aspects of the educational system there was a slight decline in mathematics performance from 1964 to 1978 at the 13 year old level at the year 12 level the performance increased in spite of increases in student participation rates at this level
