bringing together many results previously scattered throughout the research literature into a single framework this work concentrates on the application of the author s algebraic theory of surgery to provide a unified treatment of the

invariants of codimension 2 embeddings generalizing the alexander polynomials and seifert forms of classical knot theory

this book provides a comprehensive guide for the analysis and design of anchor systems used for mooring offshore floating structures much of the experience is based on applications toward the offshore oil and gas industry but the substantial potential for offshore renewable energy systems is addressed the major types of anchors are described with respect to their basic design concept advantages and limitations appropriate framework for analysis and observed performance this book addresses all aspects of anchor behaviour related to anchor design including the installation performance load capacity deformation and structural integrity of the anchor itself coverage is also provided of appurtenant components of anchor systems in particular of anchor line chain mechanics in the soil and water columns much of the material presented represents relatively new developments including several new anchors which have been developed within the last decade so the book will provide a useful compendium of information is largely scattered in journals and conference proceedings this book is intended for engineers engaged in offshore geotechnics and marine engineers involved in mooring system and floating structure design while the analytical methods presented in this text have a strong theoretical basis the emphasis is on simplified computational formats accessible to design engineers

this book covers the progress of the last 10 years of studies on cocoa butter descriptions of several aspects including physical characteristics such as rheology hardness melt profiles etc studied by new and advanced techniques are included similarly the polymorphism of cocoa butter is reconsidered in light of studies done by synchrotron dsc ftir and saxs techniques these data are complemented by new understandings on the cause of the crystallization and transitions of the polymorphs other aspects such as the effect of minor components emulsifiers and other fats are discussed in great detail in this book brings together all that is known about cocoa butter into one book describes physical characteristics of cocoa butter including rheology hardness and melt profiles reconsiders polymorphism of cocoa butter in light of recent studies by various analytical techniques presents new understandings on the cause of crystallization and transitions of polymorphs

this book explores the role calcium signaling plays in cellular responses in almost all types of cells including airway smooth muscle cells this universal signaling may result from extracellular calcium influx and or intracellular calcium

release which are precisely controlled and regulated by ion channels exchangers and or transporters on the plasmalemmal or sarcoplasmic reticulum membrane first several chapters detail calcium release channels ryanodine receptors and inositol trisphosphate receptors voltage dependent potassium channels transient receptor potential channels orai channels calcium activated potassium channels and calcium activated chloride channels well characterized sodium calcium exchangers voltage dependent calcium channels and calcium pumps are described also in depth over many chapters Ca^{2+} signaling can be expressed in Ca^{2+} sparks waves oscillations and global changes in intracellular Ca^{2+} concentration calcium in subcellular compartments cytosol sarcoplasmic reticulum mitochondria and caveolae also exhibit dynamic crosstalk many molecules including Ca^{2+} binding proteins cyclic adenosine diphosphate ribose reactive oxygen species rhoa kinases caveolin and integrins can modify and induce spatial temporal and compartmental variations of calcium signaling in addition calcium signaling can exhibit sex hormone and age dependent changes a number of chapters are dedicated to covering these diverse formats spatiotemporal characteristics multifaceted network and mathematical modeling of Ca^{2+} signaling neurotransmitters hormones growth factors inflammatory cytokines and other stimuli may lead to multiple cellular responses by inducing Ca^{2+} signaling in airway smooth muscle cells increasing evidence suggests that Ca^{2+} pumps and canonical transient receptor potential channels are essential for airway smooth muscle remodeling accordingly several chapters summarize recent advances in the studies of the key role of calcium signaling in physiological cellular responses as well as the development of asthma chronic obstructive pulmonary disease and other respiratory disorders

this book gives a comprehensive overview of recent advances in retrovirology as well as general concepts of molecular biology of retroviral infections immunopathology diagnosis and prevention to current clinical recommendations in management of retroviruses including endogenous retroviruses highlighting the ongoing issues recent advances with future directions in diagnostic approaches and therapeutic strategies

the aim of the present book is to comprehensively review current advances in understanding of genetics structural biology pharmacology of potassium channels and their roles in disease as well as to identify current gaps in knowledge the ultimate goal is to provide a scientific foundation for better understanding of modulatory mechanisms and pharmacology of potassium channels and to use this understanding to drive future drug discovery this book will be a

must have for academic and industrial scientists interested in physiology pharmacology pathology and structure functional relationships of ion channels the book will also be helpful for lecturers and students in the college and university classrooms as well as for anyone interested in the state of the art in modern cell biology physiology and pharmacology
