an expert on the psychology of decision making at berkeley s haas school of business helps readers calibrate their confidence arguing that some confidence is good but overconfidence can hinder growth a surge of confidence can feel fantastic offering a rush of energy even a dazzling vision of the future it can give us courage and bolster our determination when facing adversity but if that self assurance leads us to pursue impossible goals it can waste time money and energy self help books and motivational speakers tell us that the more confident we are the better but this way of thinking can lead to enormous trouble decades of research demonstrates that we often have an over inflated sense of self and are rarely as good as we believe perfectly confident is the first book to bring together the best psychological and economic studies to explain exactly what confidence is when it can be helpful and when it can be destructive in our lives confidence is an attitude that takes into account both personal feelings and the facts don moore identifies the ways confidence behaves in real life and raises thought provoking questions how optimistic should you be about an uncertain future what justifies your confidence in something amorphous and subjective like your attractiveness or sense of humor moore reminds us that the key to success is to avoid being both over and under confident in this essential guide he shows how to become perfectly confident how to strive for and maintain the well calibrated adaptive confidence that can elevate all areas of our lives

self help to millions of americans it seems like a godsend to many others it seems like a joke but as investigative reporter steve salerno reveals in this groundbreaking book it s neither in fact it s much worse than a joke going deep inside the self help and actualization movement fittingly the words form the acronym sham salerno offers the first serious exposé of this multibillion dollar industry and the real damage it is doing not just to its paying customers but to all of american society based on the author s extensive reporting and the inside look at the industry he got while working at a leading lifestyle publisher sham shows how thinly credentialed experts now dispense advice on everything from mental health to relationships to diet to personal finance to business strategy americans spend upward of 8 billion every year on self help programs and products and those staggering financial costs are actually the least of our worries sham

demonstrates how the self help movement's core philosophies have infected virtually every aspect of american life the home the workplace the schools and more and salerno exposes the downside of being uplifted showing how the empowering message that dominates self help today proves just as damaging as the blame shifting rhetoric of self help's recovery movement sham also reveals how self help gurus conduct extensive market research to reach the same customers over and over without ever helping them the inside story on the most notorious gurus from dr phil to dr laura from tony robbins to john gray how your company might be wasting money on motivational speakers executive coaches and other quick fixes that often hurt quality productivity and morale how the recovery movement has eradicated notions of personal responsibility by labeling just about anything from drug abuse to sex addiction to shoplifting a dysfunction or disease how americans blindly accept that twelve step programs offer the only hope of treating addiction when in fact these programs can do more harm than good how the self help movement inspired the disastrous emphasis on self esteem in our schools how self help rhetoric has pushed people away from proven medical treatments by persuading them that they can cure themselves through sheer application of will as salerno shows to describe self help as a waste of time and money vastly understates its collateral damage and with sham the self help industry has finally been called to account for the damage it has done also available as an ebook
