from the introduction marston morse was born in 1892 so that he was 33 years old when
in 1925 his paper relations between the critical points of a real valued function of n
independent variables appeared in the transactions of the american mathematical
society thus morse grew to maturity just at the time when the subject of analysis
was being shaped by such masters as poincaré veblen le j brouwer g d birkhoff
lefschetz and alexander and it was morse s genius and destiny to discover one of the
most beautiful and far reaching relations between this fledgling and analysis a relation

which is now known as morse theory in retrospect all great ideas take on a certain simplicity and inevitability partly because they shape the whole subsequent development of the subject and so to us today morse theory seems natural and inevitable this whole flight of ideas was of course acclaimed by the mathematical world it eventually earned him practically every honor of the mathematical community over twenty honorary degrees the national science medal the legion of honor of france
