the new york times best seller many changes are occurring now in the lives of all of us but does change have to equal crisis no not if you have the means with which you can change your experience of change and that is what you are holding in your hand this is more than a book about change it s about how life itself works it is about the very nature of change why it happens how to deal with it and how to make it be for the better on these pages are nine changes that can change everything is it possible that what you are about to read has come to you at the right and perfect time

the most important book yet from the author of the international bestseller the shock doctrine a brilliant explanation of why the climate crisis challenges us to abandon the core free market ideology of our time restructure the global economy and remake our political systems in short either we embrace radical change ourselves or radical changes will be visited upon our physical world the status quo is no longer an option in this changes everything naomi klein argues that climate change isn t just another issue to be neatly filed between taxes and health care it s an alarm that calls us to fix an economic system that is already failing us in many ways klein meticulously builds the case for how massively reducing our greenhouse emissions is our best chance to simultaneously reduce gaping inequalities re imagine our broken democracies and rebuild our gutted local economies she exposes the ideological desperation of the climate change deniers the messianic delusions of the would be geoengineers and the tragic defeatism of too many mainstream green initiatives and she demonstrates precisely why the market has not and cannot fix the climate crisis but will instead make things worse with ever more extreme and ecologically damaging extraction methods accompanied by rampant disaster capitalism klein argues that the changes to our relationship with nature and one another that are required to respond to the climate crisis humanely should not be viewed as grim penance but rather as a kind of gift a catalyst to transform broken economic and cultural priorities and to heal long festering historical wounds and she documents the inspiring movements that have already begun this process

communities that are not just refusing to be sites of further fossil fuel extraction but are building the next regeneration based economies right now can we pull off these changes in time nothing is certain nothing except that climate change changes everything and for a very brief time the nature of that change is still up to us
