tour guides a highly responsible group of professionals who are in direct communication with tourists traveling around the world have a great impact on the proper promotion of the culture of countries global peace and tolerance additionally they are also effective in the preservation of world natural heritage thus the educational status of tour guides as well as the characteristics and ethical values that they should possess need to be examined on an international scale in today's world where tourism demand is directed towards all types of tourism practices in special interest tourism should be customized in order to ensure the highest level of service quality and cultural appreciation cases on tour guide practices for alternative tourism provides emerging research exploring the theoretical and practical aspects of the occupational issues that surround tour guides and their applications within international tourism featuring coverage on a broad range of topics such as cultural education specialized learning and international business this book is ideally designed for tour guides travel agencies tour managers tour developers heritage sites museums academicians researchers students industry experts and hospitality professionals

genuine ecotourism can have many positive impacts particularly the conservation of biodiversity and cultural heritage and the creation of economic opportunities for local communities while promoting these it aims to eliminate negative impacts such as environmental degradation cultural commoditisation and playground effects unfortunately the

concept is broadly misunderstood and its true definition is widely debated it is often used as a marketing tool with some operators taking advantage of the ecotourism label to attract more business while behaving in environmentally irresponsible ways this book considers the important topic of quality control and accreditation in ecotourism describing the mechanisms that can be implemented to ensure quality in all aspects of the industry namely protected areas businesses products and tour guides

computing systems are undergoing a transformation from logic centric towards memory centric architectures where overall performance and energy efficiency at the system level are determined by the density performance functionality and efficiency of the memory rather than the logic sub system this is driven by the requirements of data intensive applications in artificial intelligence autonomous systems and edge computing we are at an exciting time in the semiconductor industry where several innovative device and technology concepts are being developed to respond to these demands and capture shares of the fast growing market for ai related hardware this special issue is devoted to highlighting discussing and presenting the latest advancements in this area drawing on the best work on emerging memory devices including magnetic resistive phase change and other types of memory the special issue is interested in work that presents concepts ideas and recent progress ranging from materials to memory devices physics of switching mechanisms circuits and system applications as well as progress in modeling and design tools contributions that bridge across several of these layers are especially encouraged
