drawing on more than 40 years of experience conducting applied social science research

and program evaluation author michael quinn patton has crafted the most comprehensive and systematic book on qualitative research and evaluation methods inquiry frameworks and analysis options available today now offering more balance between applied research and evaluation this fourth edition illuminates all aspects of qualitative inquiry through new examples stories and cartoons more than a hundred new summarizing and synthesizing exhibits and a wide range of new highlight sections sidebars that elaborate on important and emergent issues for the first time full case studies are included to illustrate extended research and evaluation examples in addition each chapter features an extended rumination written in a voice and style more emphatic and engaging than traditional textbook style about a core issue of persistent debate and controversy

1 historical remarks convex integration theory rst introduced by m gromov 17 is one of three general methods in immersion theoretic topology for solving a broad range of problems in geometry and topology the other methods are i removal of singularities introduced by m gromov and y eliasberg 8 ii the covering homotopy method which following m gromov s thesis 16 is also referred to as the method of sheaves the covering homotopy method is due originally to s smale 36 who proved a crucial covering homotopy result in order to solve the classi cation problem for immersions of spheres in euclidean space these general methods are not linearly related in the sense that successive methods subsumed the previous methods each method has its own distinct foundation based on an independent geometrical or analytical insight consequently each method has a range of applications to problems in topology that are best suited to its particular insight for example a distinguishing feature of convex integration theory is that it applies to solve closed relations in jet spaces including certain general classes of underdetermined non linear systems of partial differential equations as a case of interest the nash kuiper c isometric immersion theorem can be reformulated and proved using convex integration theory of gromov 18 no such results on closed relations in jet spaces can be proved by means of the other two methods on the other hand many classical results in immersion theoretic topology such as the classi cation of immersions are provable by all three methods

with coverage of both traditional and critical theories and approaches to european integration and their application this is the most comprehensive textbook on european integration theory and an essential guide for all students and scholars interested in the subject throughout the text a team of leading international scholars demonstrate the current relevance of integration theory as they apply these approaches to real world developments and crises in the contemporary european union

national borders are becoming increasingly open for goods and ideas and this is creating challenges both for the industrialized countries and for the developing world most countries wish to keep and to grow their industries and this requires the design and operation of very

complex systems in such a way as to maximize jobs profits and the quality of life in general under quite different conditions an improved understanding of the distinct operations variable trade offs indeed quite individual conceptual models of manufacturing systems in different regions is therefore necessitated this publication addresses various aspects involved in the achievement of the aim it presents new developments in production management methods tools for the evaluation of them and assessments of the adequacy of different production management methods applied to various classes of production systems test cases and application statistics are analysed thereby affording a comprehensive picture of the present situation and a vision for enhanced future development

pitirim a sorokin 1889 1968 was one of the most original important and controversial figures in american sociology his spectacular rise from a peasant childhood in czarist russia to the olympian heights of harvard university provides an unlikely and fascinating lens for examining the history of an entire discipline and as barry johnston shows his equally dramatic fall from favor and unexpected resurrection illuminate both sorokin s life and the tempestuous world of academic politics an outspoken revolutionary and secretary to alexander kerensky sorokin was imprisoned and ordered executed by lenin then reprieved and exiled during the 1920s he flourished as a teacher and scholar at the university of minnesota where he published several pioneering books on the russian revolution social mobility sociological theory and rural sociology harvard president a lawrence lowell was so impressed that he recruited sorokin to chair the university s first department of sociology from 1930 to 1944 the department prospered under sorokin s leadership attracting an entire generation of young scholars who in their own right would have a profound impact on the discipline in this period sorokin published several volumes of his magnum opus social and cultural dynamics and became embroiled in a bitter battle with rival talcott parsons for control of the department parsons ultimately deposed sorokin and transformed sociology into the department of social relations sorokin nevertheless stayed on at harvard where he established the center for creative altruism but otherwise continued to work in relative obscurity finally in 1963 after years in eclipse sorokin was recognized for his accomplishments when he was elected president of the american sociological association during a long and distinguished career sorokin amassed an amazingly diverse and substantial body of work much of which set the standard for the field at the same time he broke with the conventions of sociology frequently ridiculing and taunting his less adventurous colleagues for his heresy the flamboyant sorokin was condemned and driven to the periphery of a profession anxious for legitimacy as a science as a result sorokin s ideas have been consistently ignored and misunderstood for more than a quarter century based on exhaustive research in sorokin s papers and the harvard archives as well as interviews with sorokin s surviving family members former students and colleagues this biography restores sorokin to his rightful place in the pantheon of american

intellectuals

this is one of the most demanding courses for communication users and theories of communication is considered the seminal text in the field littlejohn presents theories in a clear and accessible writing style while maintaining the high level of scholarship and analysis
