the need to identify and name organisms is fundamental to any area of biological science basic or applied in order to study or conduct research on an organism or to convey information on this organism to others we must be able to attribute to it a consistent label attribution of an incorrect label may have dire consequences if dangerous plant parasites are wrongly identified as members of an innocuous genus traditional aids to nematode identification dichotomous keys use systematic criteria not always well adapted to practical identification their reliance on dichotomous principles does not allow for intra taxon variability or for missing characters

they are difficult to update and they cannot keep pace with rapidly changing classifications as experts in everyday life we recognize a horse or a dog without referring to the taxonomic descriptions of the genera *equus* or *canis* and their respective species problems in identification arise when we are not experts in the recognition of a particular organism or group of organisms then frequently in considerable frustration we reflect on the usefulness of having the advice of an expert in this group traditional identification aids are useful tools for the expert identifiers and for teaching their use is often difficult for general practitioners in nematology and they may lead to incorrect identification even at the genus level

bioinformatics brings computational methods to the analysis and processing of genomic data bioinformatics databases and systems focuses on the issues of system building and data curation that dominate the day to day concerns of bioinformatics practitioners included are chapters by many of today's leading bioinformatics practitioners describing most of the current paradigms of system building and curation including both their strengths and weaknesses biological topics covered include sequence databases metabolic pathways phenotypes variety collections gene expression atlases and neuroinformatics species range from bacteria to mammals to plants software systems and technologies covered include opm corba srs kleisli acedb based integration and laboratory workflow bioinformatics databases and systems provides a valuable introduction for newcomers to the field and a useful reference for veterans

plant parasitic nematodes are major pests of agricultural crops and cause huge monetary losses there is a very high risk of spread of plant parasitic nematodes from one country to another with the movement of plants and planting materials such as seeds bulbs corms suckers tubers rhizomes rooted plants nursery stock and cut flowers in view of the large quantities and the wide variety of materials being imported and exported it is important to assess the status of invasive nematodes and their quarantine importance in relation to agricultural trade this book contains information on around 100 invasive nematodes and their potential threat in different countries each nematode entry includes information on authentic identification geographical distribution risk of introduction host ranges symptoms biology ecology planting material liable to carry the nematode's nematode vectors chance of establishment likely impact and phytosanitary measures there are detailed accounts of diagnosis procedures including sampling isolation detection and identification of nematodes based on morphological and molecular characters the book offers a global perspective on invasive plant parasitic nematodes and useful for practitioners professionals scientists researchers students and government officials working in plant quarantine and biosecurity

this volume is based on the nato advanced study institute advances in morphometrics held in 11 ciocco tuscan y italy from july 18 30 1993 and directed by leslie f marcus the advances in morphometrics asi was advertised in nature and a number of professional journals announcements were sent to relevant institutions and departments throughout the world because nato required that the majority of attendees be from nato countries the 71 persons attending represented nine nato countries four eastern european countries now recognized as equal partners for as is and a few participants from non nato countries participants were all active

scholars in different disciplines within biology as well as computer science statistics geology and paleontology their experience ranged from that of graduate students to senior faculty as well as one emeritus scholar a complete list of the those attending and their addresses phone and fax numbers and where available e mail addresses is given in the participants list all the local arrangements were made by marco corti and anna loy of the university of rome la sapienza they made the initial contact with the ii ciocco conference center and then arranged for computer and xerox rentals design of logos organization of posters and publication of poster abstracts

nickle beltsille agricultural research center of the usda has engaged 29 internationally known experts to replace the classic work of i n filipjev 1934 and its translated revision schuurmans stekhoven jr 1941 with a modern work taking note of 188 additional genera and 4 650 more species

demand for the conservation of rapidly disappearing plants and ecological communities has provided botanists systematists and computer scientists with a unified goal the production of a computer based information checklist for all of the world s plants progress has been rapid in recent years from a diverse array of disconnected systems and databases there now exists a single internationally supervised organization that is working to create an internet accessible common directory of existing databases and a computer based vascular plants action list this book details the proceedings of that organization s symposium which examined the wide range of options open to the biodiversity community in creating a global plant species information system questions addressed include how an effective single taxonomic catalog and reference system can be conceived and implemented what computer system software and data structures might enable both contributions from many sites and global access to the information and how the needs of the biodiversity conservation pharmaceutical agrochemical biotechnology and plant breeding communities can be met by using the plant catalog as a backbone for a variety of other databases of applied botanical data this volume will be welcomed by all those in the fields of biodiversity and conservation who want to follow the details of this stimulating and important endeavor
