offering secondary math educators an innovative holistic and process orientated approach for

implementing nonroutine problems into their curriculum this book defines and establishes practical strategies to develop students problem solving skills the text focuses on the process skills necessary to solve nonroutine problems in mathematics and other subjects with the goal of making students better problem solvers both in and outside of the classroom chapters present and define a curriculum of over 60 nonroutine problems in mathematics and other content areas and explore the pedagogy to implement this type of curriculum consistent with the nctm standards and principles to action four different models of implementation are discussed alongside a structured approach through seven difficulty levels with examples to ensure that every student independent of their mastery of mathematics content can improve their ability to solve nonroutine problems it emphasizes to students how to transfer their problem solving skills to other real world areas including increasing ecological awareness appreciating diversity and addressing significant and meaningful problems in their life school and community the curriculum introduced in this book can be included as a component of a traditional four year academic high school curriculum aligned with the common core mathematical practices or as part of a one year isolated required or elective mathematics course based on extensive field testing this approach has been effective in both traditional mathematics courses and math electives such as a course in problem solving this book provides the necessary guidance to allow each mathematics teacher to effectively integrate the approach in their classrooms this book is ideal for secondary mathematics teachers of all levels as well as teachers of mathematics electives

students pursue problems they re curious about not problems they re told to solve creating a math classroom filled with confident problem solvers starts by introducing challenges discovered in the real world not by presenting a sequence of prescribed problems says gerald aungst in this groundbreaking book he offers a thoughtful approach for instilling a culture of learning in your classroom through five powerful yet straightforward principles conjecture collaboration communication chaos and celebration aungst shows you how to embrace collaboration and purposeful chaos to help students engage in productive struggle using non routine and unsolved problems put each chapter s principles into practice through a variety of strategies activities and by incorporating technology tools introduce substantive lasting cultural changes in your classroom through a manageable gradual shift in processes and behaviors five principles of the modern mathematics classroom offers new ideas for inspiring math students by building a more engaging and collaborative learning environment bravo this book brings a conceptual framework for k 12 mathematics to life as a parent and as the executive director of edutopia i commend aungst for sharing his 5 principles this is a perfect blend of inspiring and

practical highly recommended cindy johanson executive director edutopia george lucas educational foundation aungst ignites the magic of mathematics by reminding us what makes mathematicians so passionate about their subject matter grounded in research his work takes us on a journey into classrooms so that we may take away tips to put into practice today erin klein teacher speaker and author of redesigning learning spaces

educational resource for teachers parents and kids

mathematical anxiety is a feeling of tension apprehension or fear which arises when a person is faced with mathematical content the negative consequences of mathematical anxiety are well documented students with high levels of mathematical anxiety might underperform in important test situations they tend to hold negative attitudes towards mathematics and they are likely to opt out of elective mathematics courses which also affects their career opportunities although at the university level many students do not continue to study mathematics social science students are confronted with the fact that their disciplines involve learning about statistics another potential source of anxiety for students who are uncomfortable with dealing with numerical content research on mathematical anxiety is a truly interdisciplinary field with contributions from educational developmental cognitive social and neuroscience researchers the current collection of papers demonstrates the diversity of the field offering both new empirical contributions and reviews of existing studies the contributors also outline future directions for this line of research
