this book examines the relationship between eu energy politics and the law of the world trade organization wto focusing on how the eu s internal energy market can be promoted and protected in a way that is consistent with the requirements of wto law the need for a significant reorientation of the eu foreign policy including its trade and energy policy has become apparent in today s rapidly changing geopolitical context many states are responding to this situation by seeking to increase their strategic sovereignty in the eu this

reorientation is taking place under the leitmotifs of strategic autonomy in its foreign affairs and open strategic autonomy in the eu's external trade context given that the many current geopolitical shifts also affect the international energy landscape it has been argued that the eu needs to increase its autonomy in the field of energy policy as the eu's internal energy market is central to this it needs to be protected from undue foreign influence in this respect three horizontal unilateral tools that are part of the eu's strategy of open strategic autonomy have been considered essential in relevant academic studies the eu investment screening regulation the eu carbon border adjustment mechanism cbam and the eu foreign subsidies regulation this study shows that while it is strategically imperative to protect the internal energy market from undue foreign influence it is difficult to achieve this objective in a wto compatible manner on the basis of the unilateral measures adopted by the eu
