responding to a diplomatic stalemate and a catastrophic humanitarian crisis yemen s civil actors work every day to build peace in fragmented local communities across the country this book shows how their efforts relate to longstanding justice demands in yemeni society and details three decades of alternating elite indifference toward or strategic engagement with questions of justice exploring the transformative impact of the 2011 uprising and yemenis substantive wrestling with questions of justice in the years that followed leading yemen scholar stacey philbrick yadav shows how the

transitional process was ultimately overtaken by war and explains why features of the transitional framework nevertheless remain a central reference point for civil actors engaged in peacebuilding today in the absence of a negotiated settlement everyday peacebuilding has become a new site for justice work as an arena in which civil actors enjoy agency and social recognition drawing on seventeen years of field research and interviews with civil actors yadav positions yemen s non combatants not or not only as victims of conflict but as political agents imagining and enacting the justice they wish to see

the transition process in yemen since the arab spring has defied expectations the country moved from the brink of civil war to a managed transition process under international mediation that has largely remained on track despite repeated setbacks and delays what has enabled this is a combination of a domestic balance of weakness and concerted international mediation efforts yemen s multipolarity however threatens to undo the achievements made and tear the country apart because major challenges from a dismal security and humanitarian situation to questions of statehood remain unresolved

this international relations study investigates the underlying causes of the yemen crisis by analyzing the interactions of global regional and local actors at all phases gcc member states played a key role from political negotiations amidst street protests in 2011 to formation of an international military coalition in 2015 using a multi actor model the book shows that various actors whether state or non state foreign or domestic combined to create a disastrous armed conflict and humanitarian crisis yemen s tragedy is often blamed on saudi arabia and its rivalry with iran which is usually defined in sectarian sunni shia terms yet the book presents a more complex picture of what happened due to involvement by many other foreign actors such as the uae un uk us eu russia china turkey oman qatar and african states of the red sea and horn of africa

yemen has faced continuing crises since 2010 the fighting and divisions have destroyed much of yemen s physical political and social infrastructure undermining its tribal traditions and religious tolerance and impoverishing the country the outbreak of war in 2015 caused the world s worst humanitarian crisis in this book yemeni and international experts assess what political arrangements are required to overcome fragmentation and discord in yemen they look to understand how people from all parts of the county can work together to build a new yemen one that will give a voice to its young population and provide a full role for women the contributors argue that yemen s major resource is its population but that yemenis need to be motivated and trained to give them the skills to rebuild the economy and to prepare for long term challenges such as water shortages and climate change the volume also discusses how the international community will need to absorb the lessons of the past to find better ways of creating the institutions mechanisms and transparency with yemenis that will enable the flow of vital assistance to where it is most needed the book provides an

up to date analysis to help governments and international agencies who will have to work with yemen and its neighbours in the post conflict situation

the dramatic uprisings that ousted the long standing leaders of several countries in the arab region set in motion an unprecedented period of social political and legal transformation the prosecution of political leaders took centre stage in the pursuit of transitional justice following the arab spring through a comparative case study of egypt libya tunisia and yemen this book argues that transitional justice in the arab region presents the strongest challenge yet to the transitional justice paradigm this paradigm is built on the underlying assumption that transitions constitute a shift from non liberal to liberal democratic regimes where often legal measures are taken to address atrocities committed during the prior regime the book is guided by two principal questions first what trigger and driving factors led to the decision of whether or not to prosecute former political leaders and second what shaping factors affected the content and extent of decisions regarding prosecution in answering these questions the book enhances our understanding of how transitional justice is pursued by different actors in varied contexts in doing so it challenges the predominant understanding that transitional justice uniformly occurs in liberalising contexts and calls for a re thinking of transitional justice theory and practice using original findings generated from almost 50 interviews across 4 countries this research builds on the growing critical literature that claims that transitional justice is an under theorised field and needs to be developed to take into account non liberal and complex transitions it will be stimulating and thought provoking reading for all those interested in transitional justice and the arab spring

democratic transitions have occurred in many countries in various regions across the globe such as southern europe latin america africa east and southeast asia eastern europe and the middle east and these nations have undergone simultaneously political economic and social transformations yet the patterns and characteristics of transitions have varied significantly and different modes of transition have resulted in different outcomes this book offers cross national comparisons of democratic transition since the turn of the twentieth century and asks what makes democracies succeed or fail in doing so it explores the influence the mode of transition has on the longevity or durability of the democracy by theoretically examining and quantitatively testing this relationship the authors argue that the mode of transition directly impacts the success and failure of democracy and suggest that cooperative transitions where opposition groups work together with incumbent elites to peacefully transition the state result in democracies that last longer and are associated with higher measures of democratic quality based on a cross national dataset of all democratic transitioning states since 1900 this book will be of great interest to students and scholars of international politics comparative politics and democracy and democratization studies

legislatures are vital to new democracies and to date no democracy has survived without one exploring the dynamics and mechanisms that facilitate or

weaken the role of the parliament ahmed abdul kareem saif reinforces the importance of placing the parliament in a context that shows how it reflects its socio political surroundings a detailed analysis of the development of the elected legislative body in yemen from its establishment after unification in 1990 this work enables researchers to clearly identify not only the similarities between societies but also the crucial differences

currently women sand gen der studies programs exist in many countries around the world it is a crucial task for the future of this still emerging discipline to enhance international communication and cooperation between study programs students scholars activists and professionals if we consider the ideals and concepts of emancipation and participation as core principles of women sand gen der studies then our global networking requires systematic inclusion of non western perspectives at all levels of research teaching and curriculum development the international conference societies in transition challenges to women s and gender studies held at carl von ossietzky universität oldenburg germany from june 28 through july 1 2001 was intended as a step in this direction bringing together speakers all represented in this book from a variety of countries poland and hungary great britain and new zealand india and nepal south africa jordan turkey and yemen although this list might at first appear arbitrary its composition was both carefully and intentionally constructed as organizers we knew that a comparatively small conference could not entertain a fully inclusive representation of women s and gender studies programs worldwide

have arab uprisings opened space for deeper grassroots driven decentralization reforms in the region what are the optimum designs sequencing and models of decentralization for countries in political transition while political discourse in the region uniformly emphasizes reforming state institutions decentralization reform agendas have unfolded along contrasting trajectories across arab transition countries both contextual and historical dynamics seem to shape visions for the orientation and pace of decentralization reforms as well as the empirical feasibility of shifting power relations among the various tiers of state administration drawing on findings from field research and recent analyses this study argues that uprisings have created stronger momentum for revisiting the question of decentralization reforms in libya and yemen where the very nature of the state is being redefined compared to the cases of egypt and tunisia where all stakeholders agree on preserving the unitary state model in the latter cases while there is evidence that new advocacy movements focused on reforming local government structures have emerged they have thus far remained elite led grassroots activism at local community levels has served to empower new actors who in some cases have been successful at extracting concessions from local authorities these efforts however predominantly focus on improving access to public services within the existing context of centralized state structures and seem often to have failed to gain the trust of local community members as potential partners in local governance building on focus group discussions among working class residents in greater cairo and on interviews with egyptian political elites the study highlights an emerging critical gap between youth expectations and on the other hand the envisioned plans of the political elite while youth are more likely to demand deeper reforms across all three dimensions of

decentralization administrative fiscal and political political elites disagree not only on which particular dimension s of reforms should be implemented but also on the urgency of decentralization during early phases of political transformation the latter s wide range of views reflect deep concerns over political capture by traditional elites weakness of political parties as well as potentially detrimental impacts of reforms on state capacity and the nation state s territorial integrity the study concludes by drawing lessons from france s successful contract based record of decentralization and presents policy recommendations for countries that have emerged from the arab uprisings with relatively strong centralized state structures and cohesive national identities publisher s description

in november 2011 an agreement brokered by the gcc brought an end to yemen s tumultuous uprising the national dialogue conference has opened a window of opportunity for change bringing yemen s main political forces together with groups that were politically marginalized yet the risk of collapse is serious and if yemen is to remain a viable state it must address numerous political social and economic challenges in this invaluable volume experts with extensive yemen experience provide innovative analysis of the country s major crises centralized governance the role of the military ethnic conflict separatism islamism foreign intervention water scarcity and economic development this is essential reading for academics journalists development workers diplomats politicians and students alike

the objective of this paper is to highlight the crucial importance of security sector reform during the challenging time of democratic transition many security services in arab countries do not utilize modern management practices or computer based administrative systems and lack human resources and career development departments let alone an inspector general s office to ensure discipline or an internal affairs section to address public complaints this paper argues that any sustainable governance reform of the social contract in arab countries in transition is inextricably linked to a new concept of the security sector based on good governance principles that could permeate a new political consensus profound institutional reforms and a new legal framework security services in these countries must change to serve the public rather than the political interest for the purpose of accountability efficiency and professionalism and in order to create a culture of institutionalization civilian oversight of the security sector is essential for their part new civilian leaders must ensure that the security sector receives proper equipment and an adequate budget particularly for salaries and training security sector reform in the arab region must be a cultural and ideological discussion rather than a merely technical one publisher s description

this book consists of articles on the current institutional economic and managerial transformation and its impediments in central and eastern europe as well as east asia comparison in the euro asian dimension as this book is structured is worldwide unique particular emphasis is placed on the general role of the state institutions internal and external other transformation actors and their interplay with underlying specific structural and cultural features

for economic systems further empirical sector issue centered and in particular country case studies are provided contributions have been made by scholars and experts with long experience in transformation analysis

Tips for Maximizing Your Ebook Experience

To make the most out of your ebook reading experience, consider these tips.

Choosing the Right Device

Whether it's a tablet, an e-reader, or a smartphone, choose a device that offers a comfortable reading experience for you.

Organizing Your Ebook Library

Use tools and apps to organize your ebook collection, making it easy to find and access your favorite titles.

Syncing Across Devices

Many ebook platforms allow you to sync your library across multiple devices, so you can pick up right where you left off, no matter which device you're using.

Challenges and Limitations

Despite the benefits, free ebook sites come with challenges and limitations.

Quality and Availability of Titles

Not all books are available for free, and sometimes the quality of the digital copy can be poor.

Digital Rights Management (DRM)

DRM can restrict how you use the ebooks you download, limiting sharing and transferring between devices.

Internet Dependency

Accessing and downloading ebooks requires an internet connection, which can be a limitation in areas with poor connectivity.

Future of Free Ebook Sites

The future looks promising for free ebook sites as technology continues to advance.

Technological Advances

Improvements in technology will likely make accessing and reading ebooks even more seamless and enjoyable.

Expanding Access

Efforts to expand internet access globally will help more people benefit from free ebook sites.

Role in Education

As educational resources become more digitized, free ebook sites will play an increasingly vital role in learning.

Conclusion

In summary, free ebook sites offer an incredible opportunity to access a wide range of books without the financial burden. They are invaluable resources for readers of all ages and interests, providing educational materials, entertainment, and accessibility features. So why not explore these sites and discover the wealth of knowledge they offer?
