this book provides a comprehensive account of kant's development from the 1755 56 metaphysics to the cosmological antinomy

of 1781 with the theory of the heavens 1755 and the physical monadology 1756 the young kant had presented an ambitious approach to physical cosmology based on an atomistic theory of matter which contributed to the foundations of an all encompassing system of metaphysics why did he abandon this system in favor of his critical view that cosmology runs into an antinomy according to the critique of pure reason cpr this book answers this question by focusing on kant s methodology and the internal problems of his 1755 56 theory of nature a decisive role for kant s critical turn plays the argument from incongruent counterparts 1768 which drew much attention among philosophers of science though not sufficiently in kant research furthermore the book analyses the genesis of the cosmological antinomy in the 1770s the logical structure of the antinomy in the cpr its relation to transcendental idealism as explained in the experiment of pure reason 1787 and its role for the teleology of human reason the book is addressed to kant scholars philosophers of science and students of kant s philosophy
