a multi level analysis of pakistani human bombs reveals that suicide terrorism is caused by multiple factors with perceived effectiveness vengeance poverty and religious fundamentalism playing a varying role at the individual organizational and environmental levels nationalism and resistance to foreign occupation appear as the least relevant factors behind suicide terrorism in pakistan the findings of this research are based on a multi level analysis of suicide bombings incorporating both primary and secondary data in this study the author also decodes personal demographic economic and marital characteristics of pakistani human bombs on average pakistani suicide bombers are the youngest but the deadliest in the world and more than 71 percent of their victims are civilians earlier concepts of a weak link linking terrorism with poverty and illiteracy do not hold up against the recent data gathered on the post 9 11 generation of fighters in pakistan in suicidal and non suicidal categories as the majority of fighters from a variety of terrorist organizations are economically deprived and semi literate the majority of pakistani human bombs come from rural backgrounds with very few from major urban centres suicide bombings in pakistan remain a male dominated phenomenon with most bombers being single men demographic profiling of pakistani suicide bombers based on a random sample of 80 failed and successful attackers dents the notion that american drone strikes play a primary role in promoting terrorism in all

its manifestations the study concludes that previous scholarly attempts to explain suicide bombings are largely based on middle eastern data thus their application in the case of pakistan can be misleading the pakistani case study of suicide terrorism demonstrates unique characteristics hence it needs to be understood and countered through a context specific and multi level approach

an original contribution to our understanding of a phenomenon that is reshaping the world this title thoroughly discusses the transformation of the energy security policy arena brought on by two dramatic developments the increased potential availability of energy in many parts of the world on the supply side and on the demand side increasing concerns over the harmful effects on the environment brought on by the use of fossil fuels an in depth discussion specifically focuses on what energy security means to different countries and examines which of those countries appear to be managing their energy climate transitions successfully and which are having a more difficult time adapting to the new environment part 1 introduces the topic covering the main themes and provides an overview of the chapters part 2 provides a framework for policy evaluation considering the evolving factors affecting energy security and the energy climate policy trilemma parts 3 to 6 discuss energy transitions in the carbon producing countries saudi arabia canada iran russia mexico in intermediate carbon producing consuming countries china united states uk brazil argentina south africa in carbon consuming countries germany japan south korea israel india spain and finally in carbon reduction countries france denmark switzerland part 7 looks at attempts at regional international cooperation part 8 considers the prospects for the future examining technological breakthroughs this title builds on the theme of unfolding energy transformations driven by but increasingly constrained by climate environmental considerations it is ideal for researchers and students in the areas of environmental politics and policy climate change and energy and climate security as well as for academics and professionals

this book is an in depth collection aimed at developers and scholars of research articles from the expanding field of digital libraries provided by publisher

international trade and investment have enabled many countries in the asia pacific region to boost economic growth and have lifted millions out of poverty as the asia pacific region continues to thrive economically trade and investment barriers are being dissolved and eliminated as countries begin to depend on each other more trade policy is gradually becoming a useful measure to achieve inclusive and sustainable development trade and investment are linked to the environment and social issues hence their impacts are also multi dimensional it has now been recognized that sustainable production and consumption are essential for sustainable development countries realize that they are not able to approach global and regional problems on their own and require cooperation both at the level of government and business as a result the region has been active in concluding regional cooperation frameworks which routinely are centered on trade and investment in the meantime business has forged regional integration through the formation of regional value chains and production networks while governments have paved the way for the expansion of such production networks through the formation of regional trade agreements and economic partnerships thus the asia pacific trade agreement apta which is the oldest preferential trade agreement in the region with a large consumer base can play an important role in filling this gap given a slow progress in the multilateral negotiations in the wto especially when the members have started questioning the utility of the negotiations after 15 years and a lack of consensus on how to move forward the regional trade agreements can play a vital role even if they pose a challenge to the multilateralism selected liberalisation of trade and economy in present time can become a building block for future multilateral negotiations one of the reasons for the surge in these preferential trade agreements is to make binding commitments on wto plus and wto beyond issues while there are many agreements that exist in asia and the pacific there is no such attempt to consolidate them in one umbrella framework understanding the benefits of the consolidation one such initiative was started by escap a few years back the reci initiate for market integration could well be facilitated by apta however it cannot deliver unless it transforms itself in a new generation agreement regional integration and cooperation are also important to meet the 2030 agenda for sustainable development instead of wasting resources in discussing a new institutional framework it would be more effective to use the existing framework and for the asia pacific economies the apta provides an existing institutional platform the cases discussed in this book prepare a ground for the future and it is expected that all the stakeholders member states of escap private sector as well as researchers would benefit from this publication on apta south south regional integration and sustainable development
