this study examined the factors that enhance the likelihood that teachers will integrate technology  
into their classrooms starting with a historical perspective on technology integration the study  
categorized these factors and shed light on which ones have become obstacles if obstacles or  
barriers are identified then eliminated or at least minimized the likelihood of teachers integrating  
technology into their classrooms may become a more promising realization another integral part  
of this study discussed strategies utilized in models of teacher professional development with the  
intent of identifying which approaches or models or combinations thereof had the best chance for  
successful implementation the literature suggested that traditional or standard professional  
development approaches have not proved very successful school based and self directed models  
having evolved somewhat over the years have shown more promise although no singular approach  
can be recommended to suit schools overall instead a combination of these approaches as well as  
the addition of a student based approach was recommended the goal of this study was to provide  
data that may be used to create new alternatives for training educators this study adds to the  
limited research regarding effective teacher professional development in the area of technology  
integration schools will be able to use the data to re think re organize and add valuable training  
resources to their current staff development design this reorganization is needed so that educators
