technology can impact the service sector in a variety of ways it can be used to transform a number of service related businesses including hospitality tourism banking healthcare and others businesses navigating the rapidly changing landscape of services and technology can benefit from it by using emerging technology to create new services or improve existing ones with the rapid rise in technology the regulatory landscape is changing requiring additional changes to ensure responsible innovation and protect consumers interests transforming the service sector with new technology strives to stimulate innovation aid in strategic decision making and benefit service industries as a whole it provides valuable information about how technology is impacting and transforming the services sector and insights in responsibly regulating it covering topics such as customer engagement recovery strategies and technology driven product placement this book is an excellent resource for industry decision makers industrialists hospitality professionals entrepreneurs policymakers scholars academicians professionals and more

a much needed sobering look at the seductive promises of new technologies you couldn't ask for a better guide than Jack Stilgoe his book is measured fair and incisive Hannah Fry University College London UK and author of *Hello World: How to be Human in the Age of the Machine* a cracking and insightful little book that thoughtfully examines the most important political and social question we face how to define and meaningfully control the technologies that are starting to run our lives Jamie Bartlett author of *The People vs Tech* how the internet is killing democracy and how we save it innovation has not only a rate but also a direction Stilgoe's excellent new book tackles the directionality of AI with a strong call to action the book critiques the idea that technology is a pre-determined force and puts forward a concrete proposal on how to make sure we are making decisions along the way that ask who is benefitting and how can we open the possibilities of innovation while steering them to deliver social benefit Mariana Mazzucato University College London UK and author of *The Value of Everything: Making and Taking in the Global Economy* looking closely at the prospects and problems for autonomous vehicles Jack Stilgoe uncovers layer after layer of an even more fascinating story the bizarre disconnect between technological means and basic human ends in our time a tour de force of history and theory the book is rich in substance unsettling in its questions and great fun to read Langdon Winner Rensselaer Polytechnic Institute USA too often we understand the effects of technological change only in hindsight when technologies are new it is not clear where they are taking us or who's driving innovators tend to accentuate the benefits rather than risks or other injustices technologies like self-driving cars are not as inevitable as the hype would suggest if we want to realise the opportunities spread the benefits to people who normally lose out and manage the risks Silicon Valley's disruptive innovation is a bad model steering innovation in the public interest means finding new ways for public and private sector organisations to collaborate

In this paper we study how aggregate output responds to the arrival of a new general purpose technology GPT by looking at adjustment mechanisms that operate through labor markets we show that under a wide set of circumstances the arrival of a new GPT that raises long run output can trigger a recession in the short run furthermore we characterize features of the GPT that produce a cyclical adjustment path an initial recession occurs whenever a higher education level is required to operate the new GPT but a recession can also occur when the new GPT has lower educational requirements a cyclical adjustment path is more likely when inexperienced workers are less productive with the new technology and the faster productivity rises with experience in the new sector

The embedding of any new technologies in society is challenging the evolving state of the scientific art often unquantifiable risks and ill defined developmental trajectories have the potential to hinder innovation and or the commercial success of a technology there are however a number of tools that can now be utilized by stakeholders to bridge the chasm that exists between the science and innovation dimensions on the one hand and the societal dimensions on the other this edited volume will draw together leading researchers from the domains of law philosophy political science public administration and the natural sciences in order to demonstrate how tools such as for example constructive technology assessment regulatory governance and societal scenarios may be employed by stakeholders to assist in successfully embedding new technologies into society this volume will

focus primarily on the embedding of two emergent and emerging technologies nanotechnologies and synthetic biology government industry and the epistemic community continue to struggle with how best to balance the promised benefits of an emerging technology with concerns about its potential impacts there is a growing body of literature that has examined these challenges from various cultural scientific and jurisdictional dimensions there is however much work that still needs to be done this includes articulating the successes and failures of attempts to the societal embedding of technologies and their associated products this edited volume is significant and timely as unlike other books currently on the market it shall draw from real work experiences and experiments designed anticipate the societal embedding of emerging technologies this empirical work shall be supported by robust theoretical underpinnings provided by publisher

after the nixon and ford administrations liberal democrats hoped jimmy carter s election in 1976 would restore the new deal agenda in the white house instead during four tumultuous years in office carter endorsed many of the fiscal and economic policies later espoused by his republican successor ronald reagan but carter also backed most new deal social programs and however reluctantly pursued a traditional containment foreign policy in this book more than a dozen eminent scholars provide a balanced overview of key elements of carter s presidency examining the significance of his administration within the context of evolving american policy choices after world war ii they seek not only to understand the troubled carter presidency but also to identify the changes that precipitated and accompanied the demise of the new deal order by the time carter took office many americans had become disenchanted with big government and welfare spending and his presidency is viewed in these pages as a transitional administration as this volume demonstrates carter s dilemma emerged from his effort to steer a course between traditional expectations of federal government and new political and economic realities while most of the contributors agree that his administration may be justly criticized for failing to find that course they generally conclude that carter was more successful than his critics acknowledge these thirteen original essays cover such topics as the economy trade and industrial policies welfare reform energy environment civil rights feminism and foreign policy they offer thoughtful assessments of carter s performance focusing on policy both as cause and effect of the post industrial transformation of american society that shadowed his administration a final essay shows how carter s public spirited post presidential career has made him one of america s greatest ex presidents grounded on research conducted at the carter library the carter presidency is an incisive reassessment of an isolated democratic administration from the vantage point of twenty years it is a milestone in the historical appraisal of that administration inviting us to take a new look at jimmy carter and see what his presidency represented for a dramatically changing america

an introduction to and meditation on the key concepts history evolution complexities and importance of law in our nation s 233 year existence

now thoroughly revised and updated the book discusses recent breakthroughs in media technology including such exciting advances as video discs and cassettes two way television satellites cable and much more

a fateful conceptual gap separates the policy makers and managers charged with promoting technology and the risk and technology assessors responsible for controlling it this hampers the effective use of many new technologies and prevents the development of others the strategy of constructive technology assessment cta addresses this gap through facilitating societal learning processes and proposing a shared responsibility for the promotion and control of new technologies combining analysis of both cases and concepts managing technology in society confronts the underdevelopment of innovative potential for achieving goals of wealth sustainability and safety factors that block change as well as conditions for successful learning are identified in a wide ranging selection of cases that encompass biotechnology clean technologies information and medical technologies the contributors build on the convergence of recent theories on technical change within economics sociology and the history of technology to offer suggestions for cta action and so create a new paradigm of managing technology in society book jacket title summary field provided by blackwell north america inc all rights reserved
