the book has been primarily designed for the students of a foundation course for the subject principles and practice of accounting it has been revised as per the new updates in the syllabus and is applicable for the students appearing for ca foundation examination november 2019 and onwards the book provides conceptual knowledge and understanding of various principles and systems of accounting and their practical application in different sets of business transactions

this book explores the relationship between space subjectivity and property in order to invert conventional socio legal understandings of property sarah keenan demonstrates that new political possibilities for property may be

unveiled by thinking about property in terms of space and belonging rather than exclusion drawing on feminist and critical race theory this book shifts focus away from the propertied subject and on to the broader spaces in and through which the propertied subject is located using case studies such as analyses of compulsory leases under australia s northern territory intervention and lesbian asylum cases from a range of jurisdictions keenan argues that these spaces consist of networks of relations that revolve around belonging not just belonging between subject and object as property is traditionally understood but also the less explored relation of belonging between the part and the whole this book therefore offers a conceptually useful way of analysing a wide range of socio legal issues it will be of relevance to those working in the area of property and legal geography but also to those with more general interests in socio legal studies social and political theory postcolonial studies critical race studies and gender and sexuality studies
