the gender of things is a highly interdisciplinary book that explores the power relationship between gender and the material culture of technoscience addressing a seemingly straightforward question how does a thing such as a spacesuit a humanoid robot or a

surgical instrument become a gendered object these 14 short chapters cover an original selection of things from cosmeceuticals to early motor scooters from scrum boards to border walls and from robots to the human body and its parts by historically examining how significance has been attached to specific things and how things were designed and produced the chapters reveal how the concept of gender has been embedded and finds expression in the material world of science and technology with insights from science and technology studies sts anthropology the history of ergonomics museum studies the history of science technology and medicine but also the philosophy and sociology of technology and feminist new materialism this collection reminds us that our material creations not only bear knowledge about our world the gender of things will be of key interest to undergraduate and graduate students and research scholars of sts as well as gender studies the introduction and chapter 4 of this book are freely available as downloadable open access pdfs at taylorfrancis.com under a creative commons attribution non commercial no derivatives cc by nc nd 4 0 license
