The difference is that leaving your porch light on while you're at work won't make you dinner, but leaving your slow cooker bubbling will. Some slow cookers add to their efficiency with built-in timers, allowing you to set a time for the cooker to start, stop, or raise and lower the cooking temperature while you are gone. Single pot cooking means less dishes, which is both a time saver for you and a help for the environment. Also, the lower temperatures of a slow cooker mean you avoid the burned, cooked hard glazes and crusts that make
