this book is valuable to those involved in the evaluation of public organisations particularly insightful is the realization that similar challenges faced in various organizations are addressed with very different solutions

the un rome based agencies rbas fao ifad and wfp collaborate in many forms from joint advocacy policy and technical work to joint projects this is the first independent evaluation of collaboration among the rbas it has been jointly undertaken by the evaluation offices of fao ifad and wfp the evaluation s primary objective was to assess whether and to what extent rba collaboration is contributing to the achievement of the 2030 agenda particularly at country level the evaluation found that collaboration among the rbas is a daily reality reflecting the shared strengths and commitment of these distinctly different organizations although competition for resources continues in some contexts there is widespread recognition of complementarity in some cases the current collaborative management processes are not the best way to stimulate joint work with some types of collaboration imposing higher transaction costs the operating context for the rbas is dynamic with significant potential and where realism and pragmatism are key to meaningful and effective collaboration presently efforts to promote rba collaboration are not fully grounded in an accurate understanding of the conditions in which it is most effectively pursued and the formal statements of corporate commitment to collaboration reflect this the report makes six recommendations of which five are addressed to management of the three agencies and one of which targets the member states recommendation 1 update the mou among the rbas although the current five year mou was only signed three years ago significant changes since then make an update necessary

recommendation 2 restructure and reinforce the coordination architecture for rbac within the framework of unds reform to ensure that at all levels the coordination and evaluation of rbac includes more proactive efforts to develop and disseminate lessons and knowledge about how to optimize collaboration among and beyond the rbas about the costs and benefits of rbac and about technical experience that can be usefully shared recommendation 3 further embrace the new joint programming mechanisms at the country level and ensure constructive collaborative rba engagement with these mechanisms recommendation 4 focus administrative collaboration efforts on further embracing the united nations efficiency agenda recommendation 5 in considering the development of joint projects and programmes assess the costs and benefits of the proposed collaboration and only proceed if the benefits outweigh the costs recommendation 6 the member states of the rba governing bodies should reappraise and adequately resource their position on rba collaboration
