is archaeology an art or a science this question has been hotly debated over the last few decades with the rise of archaeological science at the same time archaeologists have seen a change in the intellectual character of their discipline as many writers have adopted approaches influenced by social theory the discipline now encompasses both archaeological scientists and archaeological theorists and discussion regarding the status of archaeology remains polarised in this 2001 book andrew jones argues that we need to analyse the practice of archaeology through an analysis of archaeological practice influenced by recent developments in the field of science studies and with the aid of extensive case studies he develops a new framework which allows the interpretative and methodological components of the discipline to work in tandem his reassessment of the status and character of archaeology will be of interest to students scholars and professionals

the publication and distribution of scientific results is of major importance for the functioning of an information society and the tackling of the complex challenges the world faces today it is not only scholars who rely on scientific publications to advance research but also the general public which demands scientific knowledge for its forthcoming major suppliers of scientific knowledge are the researchers themselves science communicators and science journalists each of which choose their very own approaches to selection presentation and communication of science often depending on the target group although different in their goals and approaches digital media in particular has led to great overlaps which result in interwoven relationships equally affecting both external and internal forms of science communication this edited book describes quantifies and critically discusses the

interplay between publisher and journalism driven science communication and its effect on the scholarly communication system especially on the measures of impact evaluation it is of major interest to researchers from science of science bibliometrics science communication and journalism studies

this volume presents definitive essays by internationally renowned experts and innovative younger scholars on the wide range of approaches used by art historians past and present to analyze images objects buildings and performances it provides critical considerations of key methodologies from formalism and iconography to social history and psychoanalytic approaches it foregrounds fundamental concepts from the artist the beholder and the frame to museums canons and periodization at the same time it broadens art itself as a category by considering photographs digital media performance architecture and visual culture more generally the chapters also explore new approaches and new points of view that have expanded art history's remit in exciting ways in recent years by addressing growing interest in race ethnicity and the legacies of colonialism gender identity and sexuality ecocritical approaches to making and consuming art materiality and the senses digitally informed methods the nascent field of disability studies and scientific research on vision and on the technical analysis of works of art this comprehensive collection will be indispensable for students and scholars of art history as well as for readers coming from other disciplines who are seeking fresh approaches to visual and material culture
