the book highlights the ethical aspects and issues that are inherent to economics in the context of today's prominent social institutions. It reviews a range of problems concerning dominant social institutions, namely markets, government agencies, corporate entities, financial networks, and religious systems. Further, in each case, the book takes a detailed look at the economic problems as they arise within a broader sociological and political environment, taking into account the respective ethical philosophical paradigms. It analyzes from an ethical point of view topics like the evolution of economic thought, happiness and spirituality, and human values in relation to ethics.

The volume appraises, refines, and extends the institutionalist's evolutionary theory of political economy in six different areas of inquiry: a) the provision of a fresh and comparative overview of institutional economics in general; b) the presentation and refinement of pragmatic methods of inquiry; c) the exploration of extensions and clarifications of instrumental value theory; d) the distillation of an emergent institutionalist theory of labor markets; e) the explication of a culture-based theory of economic development; and f) the formulation of an analytical design that provides direction for institutional policy making. Institutional economics theory, method, policy, appears at an especially opportune time when there is widespread and accumulating analytical dissatisfaction with received economic doctrine. The traditional neoclassical and marxist views of how to explain order and operate a political economy are now in question throughout the world. Appeals are being made for more relevant and pragmatic, less doctrinaire and dogmatic approaches to economic inquiry and problem solving. This volume provides fresh theoretical underpinnings for such problem-solving efforts.
