in the fully updated sixth edition of understanding global cultures metaphorical journeys through 34 nations clusters of nations continents and diversity authors martin j gannon and rajnandini pillai present the cultural metaphor as a method for understanding the cultural mindsets of individual nations clusters of nations continents and diversity in each nation a cultural metaphor is any activity phenomenon or institution that members of a given culture consider important and with which they identify emotionally and or cognitively such as the japanese garden and american football this cultural metaphoric approach identifies three to eight unique or distinctive features of each cultural metaphor and then discusses 34 national cultures in terms of these features the book demonstrates how metaphors are guidelines to help outsiders quickly understand what members of a culture consider important

this is a significant book for a multitude of audiences including scholars practitioners students expatriates travelers and those who are simply interested in culture this book is also an ideal reference tool since the metaphors are easy to remember yet

an anthology of 62 stories from around the non euro american world providing new definitions of cultural diversity and commonality and an invaluable tool for teachers responding to the growing need for multicultural literature over the past two decades sweeping political changes and burgeoning new technologies have resulted in communities being increasingly defined in global as well as regional and national terms although the intellectual terra nova of world cultures remains largely uncharted this anthology of sixty two stories from around the non euro american world provides what elisabeth young bruehl calls an introductory map to the great wealth of literary works now being produced in at once the particular settings of the writers experiences and the global setting young bruehl finds that while the cultural diversity the stories exemplify is amazing so too is the similarity in thematic terms of the concerns that this diversity presents thus she organized global cultures thematically to highlight and clarify how these worldwide cultures both converge and diverge a comprehensive general introduction outlines forces behind the transnational approach to literary study and chapter introductions contextualize each story stories from india cuba south africa and uruguay are connected by the theme of exile and immigration tales from nigeria guatemala cameroon and egypt share a theme of political violence and civil uprisings works from taiwan chile jamaica and syria describe commonalities of women facing effects of modernization prejudice war and immigration global cultures contributes to the fast growing body of contemporary short fictions newly available in english and is an invaluable resource to meet the need for multicultural literature

globalization has raised numerous questions about theology and culture for christians how should we respond to outsourcing

and immigration how does anti western sentiment affect the proclamation of the gospel what is the role of the church in society this book argues that christians will be most fulfilled and most effective if they embrace their cultural activity rather than feel ambivalent about it the central question of this book is how does bearing god s image relate to cultural activity nehrbass explains that spheres of culture such as political technological and social structures are systems that god has instilled in humans as his image bearers so that they can glorify and enjoy him forever therefore a theology of culture involves recognizing that the kingdom of god encompasses heaven and earth rather than pitting heaven against earth the text surveys anthropological explanations for humanity s dependence on culture and shows that each explanation provides only partial explanatory scope the most satisfying explanation is that a major functional aspect of bearing god s image is engaging in culture since the trinity has been eternally engaged in cultural functions like ruling communicating and creating each chapter contains a summary and questions about what it means to be a world changer in the twenty first century

understanding global cultures third edition presents the cultural metaphor as a method for understanding the cultural mindsets of a nation a cluster of nations and even of a continent this method involves identifying some phenomenon activity or institution of a culture that all or most of its members consider important and with which they identify closely metaphors are not stereotypes rather they rely upon the features of one critical phenomenon of a culture to describe the entire culture the

characteristics of the metaphor then become the basis for describing and understanding the essential features of the culture for example the italians invented the opera and love it passionately five key characteristics of the opera are the overture spectacle and pageantry voice externalization and the interaction between the lead singers and the chorus these features are used to describe italy and its cultural mindset thus the metaphor is a guide or map that helps such outsiders as students travelers and managers on short term and long term assignments understand quickly what members of a culture consider important

this book brings together a series of new and historical case studies to show how different phases of globalization are transforming the built environment taking a broad interdisciplinary approach the author draws on sociological geographical cultural and postcolonial studies to provide a critical account of the development of three key concepts global culture post colonialism and modernity subsequent case studies examine how global economic political and cultural forces shape the forms of architectural and urban modernity in globalized suburbs and spaces in major cities worldwide the first book to combine global and postcolonial theoretical approaches to the built environment and to illustrate these with examples spaces of global cultures argues for a more historical and interdisciplinary understanding of globalization one that places material space and the built environment at the centre and calls for new theories to address new conditions

although the great anti cult crusade links new religious movements to dangerous cults brainwashing and the need for deprogramming karla poewe and irving hexham argue that many cults are the product of a dynamic interaction between folk religions and the teachings of traditional world religions drawing on examples from africa the united states asia and europe they suggest that few new religions are really new most draw on rich if localized cultural traditions that are shaped anew by the influence of technological change and international linkages with the widespread loss of belief in biblical mythology in the nineteenth century new mythologies based on science and elements derived from various non western religious traditions emerged leading to the growth and popularity of new religions and cults

contributors to the volume focus on such important issues as media imperialism national identity cultural policy globalization of urban cultures cultural production in a global context free trade negotiations and agreements the economic impact of cultural tourism the impact of globalization on children s television and the impact of japanese culture in asia
