this volume gathers together contributions on the subject of the relationship between economic oscillations growth and structural change contributions are both empirical and theoretical and employ a sophisticated level of mathematical modelling

new perspectives on structural change is a comprehensive edited volume that outlines both the historical roots and state of the art debates on the role of structural change in the process of economic development including both orthodox and heterodox perspectives and contributions from prominent scholars in this field the volume consists of four main sections the first section covers the theoretical foundations of the structural change literature the second section presents an empirical overview of the major trends of structural change using up to date data sources and methods the third section presents a broad ranging empirical analysis of the drivers of structural change the fourth section examines how processes such as inclusive growth poverty reduction productive employment the global income distribution and environmental sustainability are affected by structural change and how they can be influenced by policy

structural change is a fundamental concept in economic model building statistics and econometrics provide the tools for identification of change for estimating the onset of a change for assessing its extent and relevance statistics and econometrics also have developed models that are suitable for picturing the data generating process in the presence of structural change by assimilating the changes or due to the robustness to its presence important subjects in this context are forecasting methods the need for such methods became obvious when as a consequence of the oil price shock the results of empirical analyses suddenly seemed to be much less reliable than before nowadays economists agree that models with fixed structure that picture reality over longer periods are illusions an example for less dramatic causes than the oil price shock with similarly profound effects is economic growth and its impacts on the economic system indeed economic growth was a motivating concept for this volume in 1983 the international institute for applied systems analysis in laxen burg austria initiated an ambitious project on economic growth and structural change

inclusive growth full employment and structural change implications and policies for developing asia discusses policies to achieve inclusive growth in developing asia including agriculture investment certain state interventions monetary fiscal and the role of the state as employer of last resort felipe argues that full employment of the labor force is the key to delivering inclusive growth full employment is the most direct way to improve the well being of the people especially of the most disadvantaged since unemployment and underemployment are pervasive in many parts of the region asian leaders must commit to the goal of full employment the book also analyzes the region's phenomenal growth in recent decades in terms of structural transformation accelerating it is vital for the continued growth of developing asia but efforts to achieve full employment might be held back given that structural transformation requires massive labor shifts across sectors and these are difficult to coordinate moreover the goal of full employment was abandoned in the 1970s and governments and central banks have since concentrated on keeping inflation low

the issues of growth performance and structural change are critical to an appreciation of british economic development this new text reviews britain's growth performance and considers the changing structure of the economy it also incorporates a discussion of the controversial political issues in this sphere disindustrialisation north sea oil and the environmental cost of economic growth against this background the book analysis the evolution of supply side policy in the post war years and speculates on its likely
