this paper investigates the trend of the wage inequality and the metropolitan wage premium in the united states during the 1980s two distinct sets of literature documented that the wage inequality between skilled and unskilled workers and the metropolitan wage premium have risen significantly during the decade when we combine these two sets of evidence and consider the interaction between skill and location however the increasing trends of the skill wage gap and the metropolitan wage premium almost disappear most of the dynamic changes are picked up by the interaction term an extra metropolitan wage premium for skill which rises significantly over the decade as a partial explanation we find an increasing trend of the skill wage inequality across industries and occupations within metropolitan areas relative to non metropolitan areas this finding suggests that the skill biased technology alone may not sufficiently explain the growing wage inequality and it can be interpreted as a metropolitan specific phenomenon to an extent

the authors intend this book to act as a short topical and issue based supplement for courses dealing with race and gender studies economics women s studies sociology and public policy where concern needs to be directed against wage inequality

this report seeks to explain the over time trends in wage inequality in latin america and the caribbean lac since the mid 1990s it explains how wage inequality has been associated with household income inequality in lac in the past decades and discusses how labor supply and labour demand trends have affected wage inequality the latin american region achieved something truly remarkable during the 2000s it sustained vigorous economic growth with declining inequality other regions in the world grew strongly during this period but this growth was not shared equitably however lower commodity prices and slower growth in china have reduced latin america s growth prospects in recent years at the same time inequality reduction has halted in many countries as the new low growth scenario hits labor markets it is important to ask whether the social gains of the 2000s can be sustained will lower wage growth occur across all segments of the wage distribution in latin america or will the slowdown disproportionately hurt those who have less will the economic slowdown put the brakes on the reduction of wage inequality in latin america to answer these forward looking questions and to know what to expect it is essential to understand the causes of the observed changes in wage inequality in the past decades which is the focus of this research project

this book integrates the agricultural producer service sector into a three sector general equilibrium framework to examine the modernization of small scale agriculture in developing economies by incorporating agricultural transformation and rural urban migration dynamics it presents a theoretical analysis of the determinants of wage inequality between skilled and unskilled labor from

multiple perspectives over the past few decades industrialization and urbanization have progressed in parallel driving the modernization of the agricultural sector traditional development economics often conceptualizes agricultural modernization within the context of large scale operations assuming that traditional agriculture can directly adopt modern non agricultural intermediate inputs after some transformations however small scale agriculture the dominant form in developing countries follows a distinct modernization path this divergence manifests in two key ways first labor substitution and migration the introduction of modern intermediate non agricultural inputs tends to displace agricultural labor accelerating rural urban migration second the role of the agricultural producer service sector due to the prevalence of small scale operations an intermediary sector the agricultural producer service sector emerges to facilitate the modernization process these differences significantly influence intersectoral labor allocation and wage inequality given that agricultural modernization policy shifts and socioeconomic changes concurrently affect labor allocation it is crucial to analyze how these exogenous factors shape wage disparities in the presence of agricultural transformation to model this process the book establishes a two layer vertical production structure non agricultural goods are partially utilized by the agricultural producer service sector which then produces intermediate inputs that substitute for agricultural labor the study focuses on three major factors that profoundly impact rural labor migration and wage inequality pro rural policies mitigation labor market distortion raising rural public infrastructure increased agricultural subsidies fdi and internal remittances and technological progress green technological progress and skill biased technical change the findings offer novel insights into wage inequality in developing economies and provide a theoretical foundation for formulating development policies

this book explores income inequality across five main headings it starts by explaining some key terms in the inequality debate it then examines recent trends and explains why income inequality varies between countries

many ideas about poverty and discrimination are nothing more than politically driven assertions unsupported by evidence and even politically neutral studies that do try to assess evidence are often simply unreliable in poverty and discrimination economist kevin lang cuts through the vast literature on poverty and discrimination to determine what we actually know and how we know it using rigorous statistical analysis and economic thinking to judge what the best research is and which theories match the evidence this book clears the ground for students social scientists and policymakers who want to understand and help reduce poverty and discrimination it evaluates how well antipoverty and antidiscrimination policies and programs have worked and whether they have sometimes actually made the problems worse and it provides new insights about the causes of and possible solutions to poverty and

discrimination the book begins by asking who is poor and by giving a brief history of poverty and poverty policy in the united states in the twentieth century including the welfare reform act of 1996 among the topics covered are the changing definition of poverty the relation between economic growth and poverty and the effects of labor markets education family composition and concentrated poverty the book then evaluates the evidence on racial discrimination in areas such as education employment and criminal justice as well as sex discrimination in the labor market and assesses the effectiveness of antidiscrimination policies throughout the book is grounded in the conviction that we must have much better empirical knowledge of poverty and discrimination if we hope to reduce them

the handbooks in economics series continues to provide the various branches of economics with handbooks which are definitive reference sources suitable for use by professional researchers advanced graduate students or by those seeking a teaching supplement with contributions from leading researchers each handbook presents an accurate self contained survey of the current state of the topic under examination these surveys summarize the most recent discussions in journals and elucidate new developments although original material is also included the main aim of this series is the provision of comprehensive and accessible surveys every volume contains contributions from leading researchers each handbook presents an accurate self contained survey of a particular topic the series provides comprehensive and accessible surveys

china and india the two largest developing countries are developing rapidly both inside themselves and towards global markets are these two economies dual or dueling this 3 volume set tries to answer this question by providing comprehensive analyses scoping varied economic issues this volume set covers both china s and india s strategies and objectives in international governance their bilateral and multilateral trade agreement negotiations financial liberalization growth prospects rural development and agriculture income distribution labor market mechanism manufacturing and competitiveness upgrading as well as environmental and other social issues the set collects papers most unpublished until now written by chinese and indian researchers who have rich experiences and strong backgrounds in policy analyses and are well connected to chinese and indian policy makers thus these papers contain valuable first hand information about china s and india s development strategies this makes this volume set an essential source of reference for china india comparisons and studies

modern labor economics has continued to grow and develop since the first volumes of this handbook were published the subject

matter of labor economics continues to have at its core an attempt to systematically find empirical analyses that are consistent with a systematic and parsimonious theoretical understanding of the diverse phenomenon that make up the labor market as before many of these analyses are provocative and controversial because they are so directly relevant to both public policy and private decision making in many ways the modern development in the field of labor economics continues to set the standards for the best work in applied economics this volume of the handbook has a notable representation of authors and topics of importance from throughout the world

analyses changes in men's earnings from the mid 1970s to 1991

diversity equity and inclusion for business management is a comprehensive and accessible guide to the evolving landscape of dei in the discipline developed in collaboration with the chartered association of business schools and written by experts in their fields this book offers a unique approach with discipline focussed chapters that cover strategy leadership organisational behaviour marketing accounting finance and more as you read about how issues of social justice diversity and inclusion relate to your studies and future careers you will be supported by a range of learning features including global case studies critical reflections and practice questions this book is essential reading for students of business and management taking modules in dei and diversity management as well as those who are interested in responsible business practice sally everett is professor of business education and vice dean education at king's business school king's college london ian hill is a lecturer in work and organisations education at king's business school king's college london

the review analyses gender differences in job mobility and the earnings consequences of career breaks following childbirth to shed light on the evolution of the gender wage gap across the working life to put results for germany in context they are systematically benchmarked to those of four nearby countries i e denmark france the netherlands and sweden the policy discussion extends the empirical analysis by putting forward a comprehensive policy package with an emphasis on policies targeted at firms

lovewell is a brief yet clear outline of economics that explains how economics relates to students' lives and to the main issues of the day lovewell is written for the one semester principles course whereas our other offerings are designed for the two semester market bright right tight are the three words a reviewer used to describe the lovewell text

compares trends in wage inequalities in the usa and nine other industrialized countries in the middle to late 1980s concludes that wages are more unequal in the usa than they are in other advanced economies

among the many achievements of the feminist movement of the 1970s was the unprecedented influx of women into academia over the last 25 years women have entered the social sciences in huge numbers bringing with them new perspectives and new insights into the social world this special issue of the annals reflects on this multivocal richly textured and dynamic revolution from anthropology to psychology to geography to criminology and more leading feminists reflect on the most significant contributions of feminist activism and feminist research to their fields two main themes run through this volume the relationship between feminist scholarship and feminist activism and the enduring controversies and future direction of feminist social science the contributions run the gamut from the impact of feminism on specific social science disciplines such as family studies archaeology political science and media studies to the influence of feminist thought on specific topics such as federally funded social science migration media practices and sexuality the main conclusion of this volume is that where reigning paradigms are strong and the accepted methodologies are limited feminist perspectives tend to be marginalized on the other hand fields that are theoretically eclectic and interdisciplinary appear to be the most welcoming to feminist influence

presents the new approach to understanding the effects of technology transfer of the developing countries by using imitation driven growth model to analyze the effects of the imitation on level of technology demand for skilled labor the output growth and especially relative wage of the host country
