this interdisciplinary book provides a cross sectoral and multi dimensional exploration and assessment of the urban geography perspectives in zimbabwe drawing on work from different disciplines the book not only contributes to academia but also seeks to inform urban policy with the view of contributing to the national aspirations of zimbabwe attaining middle income status by 2030 adopting a multi dimensional assessment that transcends disciplines such as urban and regional planning human and physical geography urban governance political science economics and development studies the book provides a background for co production concerning urban development in the global south the book contributes into its analysis of the institutional and legislative framework that relates to the urban geography of zimbabwe as these are responsible for the evolution of the urban system in the country the connections among different sectors and issues such as environment economy politics and the wider objectives of the sdgs especially goal 11 aspiring to create sustainable communities by 2030 are explored the success stories relating to urban geography in zimbabwe are identified together with the best possible practices that may inform urban planning policy and management

in the contemporary moment smart cities have become the dominant paradigm for urban planning and administration which involves weaving the urban fabric with digital technologies recently however the promises of smart cities have been gradually supplanted by recognition of their inherent inequalities and scholars are increasingly working to envision alternative smart cities informed by these

pressing challenges digital in justice in the smart city foregrounds discussions of how we should think of and work towards urban digital justice in the smart city it provides a deep exploration of the sources of injustice that percolate throughout a range of sociotechnical assemblages and it questions whether working towards more just sustainable liveable and egalitarian cities requires that we look beyond the limitations of smartness altogether the book grapples with how geographies impact smart city visions and roll outs on the one hand and how unjust geographies are produced in smart pursuits on the other ultimately digital in justice in the smart city envisions alternative cities smart or merely digital and outlines the sorts of roles that the commons utopia and the law might take on in our conceptions and realizations of better cities

overlooked cities reflects and impacts the changing landscape of urban studies and geography from the perspective of smaller and more regional cities in the urban south it critically examines the ways in which cities are uniquely positioned within different urban and knowledge hierarchies the book unpacks the dynamics of overlooked ness in these cities identifies emerging trends and processes that characterise such cities and provides alternative sites for comparative urban theory it is organised into two themes firstly politics and power and secondly production and negotiation of knowledge the authors share a commitment to challenging the unevenness of urban knowledge production by approaching these cities on their own terms only then can we harness the insights emanating from these overlooked cities and contribute to a deeper and richer understanding of the urban itself this collection of essays focusing on 13 cities in nine countries and across three continents luzhou china bharatpur nepal bloemfontein mangaung and pretoria tshwane south africa zarqa jordan santa fe argentina manizales colombia arequipa and trujillo peru dili timor leste bandar lampung semarang and bontang indonesia makes a timely contribution to urban scholarship the volume will be of interest to scholars from the disciplines of urban studies geography development and anthropology as well as postgraduate students researching the global south and third year undergraduate students studying cities and urban studies development and critical thinking

this authoritative handbook looks at the entire news cycle and provides a bridge between the theoretical and academic study of journalism and its actual contemporary practice the book s main merit is that it brings theory and practice together with contributors discussing these issues from different perspectives in a way that scholars students and practitioners can find useful in the study of journalism the handbook is also unique as it undertakes an international scope across regions and cultures both from the west and the global south while providing an overview which balances the over emphasis on content in most academic approaches to journalism the book is divided into four major parts 1 conceptual foundations 2 interlink between journalism as scholarship and journalism as practice 3 regions and cultures and 4 the practitioner world the first two sections lay down the foundation for section 3 which provides an overview of journalism practice in different regions and cultures section 4 includes contributions by practitioners in which they attempt to respond to some of the issues raised in preceding sections this handbook will appeal to academics practitioners and professionals alike who are interested in a better understanding of the academic study of journalism and its actual contemporary practice

with the rise of homelessness in many u s cities municipal governments are sanctioning organized encampments as an official strategy for sheltering unhoused people examining the shortcomings and consequences of these municipal policies the injustice of property explores how unhoused individuals living in self managed encampments navigate and organize themselves within

and against the confines of liberal property systems through ethnographic research in portland oregon a paradigmatic city in advancing this model of homeless shelter stephen przybylinski details the everyday struggles of self managed encampments to highlight how key contradictions inherent to liberal ideology maintain property as a means of structuring sociopolitical equality he argues that justice cannot be realized for unhoused communities within the liberal model of private property due to how liberalism and liberal ideology prioritize the rights and values of property over the personal rights of self governance the injustice of property is a conceptually robust and empirically rich account of the limits of liberal thinking regarding what just property relations look like for unhoused and housed people alike the book shows that while encampment communities struggle to establish alternative property relationships to the traditional model of private ownership the injustices that residents of encampments face provoke a necessary reevaluation of how beneficiaries of property systems influence who can become housing stable and on which terms this insightful book reveals how the injustices surrounding portland s encampment communities reflect the limits and injustice of liberal property more broadly
