the connection between the ability to reason through questions that require logic instead of content knowledge to answer correctly and passing scores on the virginia biology standards of learning sol test was investigated the researcher theorized that there were students who fail the biology sol test because they cannot use logical reasoning to answer questions that do not require content knowledge questions from the 2003 and 2004 biology sol tests were divided into categories including new knowledge questions those that require knowledge that should have been gained during the biology course and logic questions these require logical reasoning ability rather than content knowledge in order to answer correctly which were the question types used for this study the results showed that the logic questions were missed significantly more by students who failed the sol test than by those who passed the test which supports the researcher s hypothesis the results of the new knowledge questions showed that those who failed also missed significantly more new knowledge questions than those who passed however the results of the new knowledge questions were not as revealing as the logic questions results because the failing group included many who failed the test simply because they had not learned enough of the content material regardless of whether or not they could perform logical reasoning in light of no child left behind nclb which requires remediation efforts for those students who fail an sol test the researcher feels that inferential reasoning remediation could have wide spread effect on student achievement
