this book presents a new constitutional argument for the legitimacy of evolutive interpretation of the echr it constructs a model in which evolutive and static constitutional principles are balanced with each other the author argues that there are three possible interpretive approaches in time sensitive interpretations of the echr but that only one of them is justifiable by reference to the constitutional principles of the echr in every single case the echr s constitutional principles either require an evolutive or static interpretation or they do not establish a preference relation at all which leads to a margin of appreciation of the member states in the interpretation of the convention the balancing model requires the determination of the weights of the competing evolutive and static constitutional principles for this purpose the author defines weighting factors for determining the importance of evolutive or static interpretation in a concrete case

work and object is a study of fundamental questions in the metaphysics of art notably how works relate to the materials that constitute them issues about the creation of works what is essential and inessential to their identity their distinct kinds of

properties including aesthetic properties their amenability to interpretation their style the conditions under which they can go out of existence and their relation to perceptually indistinguishable doubles e.g. forgeries and parodies are raised and debated a core theme is that works like paintings music literature sculpture architecture films photographs multi media installations and many more besides have fundamental features in common as cultural artefacts in spite of enormous surface differences it is their nature as distinct kinds of things grounded in distinct ontological categories that is the subject of this enquiry although much of the discussion is abstract based in analytical metaphysics there are numerous specific applications including a study of Jean Paul Sartre's novel *La Nausée* and recent conceptual art some surprising conclusions are derived about the identity conditions of works and about the difference often between what a work seems to be and what it really is

We used newer larger scale 2007 colour air photos to interpret habitat attributes and classify habitat quality of 14 marbled murrelet (*Brachyramphus marmoratus*) nest sites identified in 1992 ($n = 2$) and 1999 ($n = 12$) in Mussel Inlet on the central coast of British Columbia. Mussel Inlet is a fjordland environment atypical of other areas for which the air photo interpretation classification has been tested using nest sites i.e. Haida Gwaii Vancouver Island and south coastal British Columbia. Nesting habitat described by 3 ha plots centred on the nest site was characterized in Mussel Inlet as having complex canopies with large trees in mid to low meso slope positions and as such is comparable to that reported elsewhere in British Columbia. However, comparisons of the nest plot habitat attributes to those at 27 random plots also suggested that interpretations of murrelet habitat selectivity for Mussel Inlet differed from other coastal areas due to differences in characteristics and availability of forest structures. Overall in Mussel Inlet more nest plots were classed as lower quality i.e. 50 low and very low on air photos compared to other British Columbian studies i.e. 14 low and very low although selectivity testing based on air photo habitat class was inconclusive particularly for the high and very high quality habitats for which limited habitat was available. 1 of the study area a trend was indicated for higher proportional use of moderate and low habitats and lower proportional use of very low habitats. We discuss limitations of the samples used for this study and issues in interpretation resolution and scale in applying the air photo methods in topographically complex fjordland landscapes such as Mussel Inlet. Given these limitations and issues we recommend use of aerial survey methods to confirm occurrence of nest platforms.

This book adopts a principled approach to the law applied in the construction of commercial contracts. This approach is presented as part of a coherent theory of the law of contract construction which makes a unique contribution to scholarship and understanding of the most important aspect of the practice of commercial lawyers. The law is explained by reference to three stages in construction: it distinguishes the preliminary stage in which context is established from the meaning and application stages of contract construction. The approach provides insights both into the practical problems that lawyers face in particular in relation to admissibility of extrinsic evidence and the theoretical underpinnings of the subject. The book also explains the relationship between intention and construction and discusses general and specific rules that determine the results of construction disputes. Each chapter is introduced by statements of its objectives and the book includes simple definitions of key concepts as well as summaries of the complex principles which comprise the law of construction. In illustrating construction principles and their application the exposition of the law draws on the author's knowledge of Australian contract law and the influence and role of the *Unidroit Principles* *CISG* and the *American Restatement (Second) Contracts*.
