reprint of the original first published in 1940

this book is a biography of john g fee who was a product of the great awakening of the early nineteenth century the economies of the small slave holding farm and the intimacies and comradeship of black and white children born in bracken county kentucky in 1816 fee is a unique figure in the antislavery movement most abolitionists were northern born but they were assisted and supported by many antislavery men who left the south and worked against slavery from the northern states both groups addressed themselves to the problem of slavery from the security of the north but fee was born in the south and chose to live there and work against the peculiar institution from within its stronghold he became the most important and influential reformer to wage war against slavery in the south during the nineteenth century and ultimately had the longest career in race relations extending into the twentieth century from publisher s description

includes the decisions of the supreme courts of massachusetts ohio indiana and illinois and court of appeals of new york may july 1891 mar apr 1936 appellate court of indiana dec 1926 feb 1927 mar apr 1936 courts of appeals of ohio

*publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews*

*the relevance of applied economic and social analysis stands or falls with the strength of the analytical tools on the one hand and the appropriateness of the underlying data framework on the other hand whereas virtually all economic and sociological research focuses on the analytical tools this book deals with the design of an appropriate data framework in many countries it is not so much a lack of data per se that is the problem official statistics often comprise a wealth of information laid down in many different publications the main difficulty then relates to the lack of integration of these statistics so that all kinds of events that are interrelated in reality can only be studied in isolation of course the lack of integration of statistics applies less to economic data as the national accounts function as a coordinating information system for these data in fact an important aim of this book is to demonstrate that the basic principles of national accounts can and should be extended to a wider range of statistics notably social and environmental statistics for this purpose a so called system of economic and social accounting matrices and extensions sesame is designed and applied in this book following its announcement in the 1993 system of national accounts the guidelines of the united nations and other international organizations*
