italian intellectuals played an important role in the shaping of international politics during the cold war the visions of the world that they promulgated their influence on public opinion and their ability to shape collective speech whether in agreement with or in opposition to those in power have been underestimated and understudied this volume marks one of the first serious attempts to assess

how Italian intellectuals understood and influenced Italy's place in the post World War II world. The protagonists represent the three key post-war political cultures: Catholic, Marxist, and Liberal Democratic. Together, these essays uncover the role of such intellectuals in institutional networks, their impact on the national and transnational circulation of ideas, and the relationships they established with a variety of international associations and movements.

The Encyclopedia of Italian Literary Studies is a two-volume reference book containing some 600 entries on all aspects of Italian literary culture. It includes analytical essays on authors and works from the most important figures of Italian literature to little-known authors and works that are influential to the field. The encyclopedia is distinguished by substantial articles on critics, themes, genres, schools, historical surveys, and other topics related to the overall subject of Italian literary studies. The encyclopedia also includes writers and subjects of contemporary interest such as those relating to journalism, film, media, children's literature, food, and vernacular literatures. Entries consist of an essay on the topic and a bibliographic portion listing works for further reading. And in the case of entries on individuals, a brief biographical paragraph and list of works by the person. It will be useful to people without specialized knowledge of Italian literature as well as to scholars.

Since the beginning of the last century, the lower Jurassic to mid Miocene pelagic succession exposed along the valleys of the Umbria and Marche Apennines of Italy represented a fertile playground for generations of earth scientists. This GSA Special Paper provides a reappraisal of the geological and integrated stratigraphic research which was carried out by scores of earth scientists in the gorges around the medieval city of Gubbio over the past fifty years. Following review chapters about pioneering sedimentologic, biostratigraphic, and magnetostratigraphic studies of the Gubbio sections, a series of papers presents new original data addressing different stratigraphical, paleoenvironmental, and structural geological aspects of particular Cretaceous to Paleogene intervals, including the still much-debated K-Pg boundary event in the worldwide famous site of the Bottaccione Gorge where the Alvarez theory of global mass extinction caused by a catastrophic extraterrestrial impact was born in 1980.
